

## Country case: The Anti-Corruption Strategy of the Austrian Federal Procurement Agency

### Description

To develop its Anti-Corruption Strategy, the Austrian Federal Procurement Agency (BBG) defined the following actions :

- Set precise organisational procedures (clear definition of roles and structures)
- Integrate anti-corruption measures in the workday life
- Constantly reassess and improve the strategy
- Constantly Raise awareness of staff
- Sharpen the focus on the consequences of corruption

The Strategy contains an explicit regulation of the main values and strategies regarding prevention of corruption, clear definition of grey areas (*e.g.* the difference between customer care and corruption; what is permitted, what not), clear rules on accepting gifts as well as rules on additional occupation. It also offers the employees a clear view on emergency management.
