

Julie Rozenberg

Economist, World Bank

Julie Rozenberg is an Economist with the Chief Economist of the World Bank Sustainable Development Group. Her work includes green growth and climate change mitigation strategies and climate change adaptation and disaster risk management. She participated in the writing of two major World Bank reports: “Decarbonizing Development: Three Steps to a Zero Carbon Future” and “Shockwaves: Managing the Impacts of Climate Change on Poverty”. She helps the World Bank teams and clients take climate change constraints and other long-term uncertainties into account in the preparation of projects and strategies in infrastructure sectors like transport, water or urban, to build resilience in World Bank client countries. Julie Rozenberg holds an engineering degree from Ecole Nationale Supérieure de Techniques Avancées and a PhD in economics from Ecole des Hautes Etudes en Sciences Sociales in Paris.
