Notes:

- 1) The definition of a MAP case and how counting of MAP cases is made for this annex A are the same as the 2017 MAP statistics.
- 2) The definitions used to categorise (i) attribution/allocation cases and (ii) other cases are the same as the 2017 MAP statistics.
- 3) The definitions of (i) start date and (ii) end date of a MAP case and (iii) average time taken for closing pre-IF cases used for this Annex A are the same as the 2017 MAP statistics.
- 4) Thailand has joined the inclusive framework since 2017 so the Annex A will concern pre-2017 cases.
- 5) Thailand has found 2 more pre-2017 MAP cases and they are in the MAP process.
- 6) There are some cases where taxpayers submitted completed MAP requests to treaty partners but the treaty partners informed Thailand only names of taxpayers without any other information. Thus Thailand cannot process those MAP requests.

Notes:

1) A MAP case is a case arising from a request made by a person pursuant to the MAP provisions of a tax treaty concerning the taxation of income and capital. Cases within a competent authority's MAP inventory are (i) cases arising from a request submitted directly to that competent authority by a taxpayer; and (ii) cases arising from a request submitted by a taxpayer to the competent authority of the treaty partner and subsequently presented by that other competent authority to the competent authority. These are cases arising from requests submitted under a provision based upon Article 25(1) of the OECD Model Tax Convention, or under Article 25(3), provided that in the latter case the requests are taxpayer-specific and not one for a generic interpretation of the provision of a tax treaty. A MAP case is also a case arising from a request submitted under the EU Arbitration Convention⁵³.

A MAP case however shall not include (i) a request for an Advance Pricing Arrangement (APA) including a request to apply the outcome of the APA to previous filed tax years not included within the original scope of the APA (i.e. a request for the "roll-back" of the APA); or (ii) a "protective" MAP request. A "protective" MAP request is a MAP request submitted by the taxpayer in order to ensure that its request is made within the time frame permitted under the relevant tax treaty but the taxpayer has indicated to the competent authority or agreed with the competent authority that the request should not be examined until further notification is received from the taxpayer to do so. Once such notification (that a taxpayer asks that a previously protective MAP request should now be examined) is received by the competent authority, the MAP request shall be regarded as "received by a competent authority" in the sense of paragraphs 9 and 10 of MAP Statistics Reporting Framework.

2) A MAP request submitted by the taxpayer to one or both Contracting Parties to a tax treaty shall be counted as only one MAP case if (i) the request concerns the taxation of only one taxpayer in either Contracting Party or in each Contracting Party; or (ii) where the issue submitted for MAP discussion relates to transaction(s) of an entity which is not liable to tax at the level of the entity itself (for example, a transparent entity or an entity which is subject to domestic rules on fiscal unity or similar concepts), the request concerns the transactions of only one such entity in either Contracting Party or in each Contracting Party. In these circumstances, a MAP request will be counted as one case, irrespective of whether (i) the MAP request is submitted by the taxpayer to one or more competent authorities; (ii) the number of issues and taxation years involved, so long as these issues and taxation years are covered in the same MAP request; and (iii) the MAP request is submitted to the competent authorities under both a tax treaty and the EU Arbitration Convention.

Where in either or both Contracting Parties, a MAP request concerns the taxation of more than one taxpayer or concerns more than one entity, then -

- if the number of taxpayers or entities concerned in each Contracting Party is the same, the number of MAP cases shall be equal to this number, or
- if the number of taxpayers or entities concerned in each Contracting Party is different, the number of MAP cases shall be equal to the larger number.

Any subsequent request by the same taxpayer or the same entity with respect to a similar issue but for a different taxation year or with respect to the same taxation year for a different issue shall be considered to be a new MAP request and the number of MAP cases arising from this new request shall be counted as described above.

3) Attribution/Allocation MAP Cases: An attribution/allocation MAP case is a MAP case where the taxpayer's MAP request relates to (i) the attribution of profits to a permanent establishment (see e.g. Article 7 of the OECD Model Tax Convention); or (ii) the determination of profits between associated enterprises (see e.g. Article 9 of the OECD Model Tax Convention), which is also known as a transfer pricing MAP case. Other MAP Cases: Any MAP case that is not an attribution / allocation MAP case shall be reported as "Others".

4) Average time take from "Start" to "End" of MAP case

The average time taken from "start" to "end" of MAP case shall be calculated by first aggregating the number of months from the "start" date to the "end" date for each case where the "end" date for the case falls within the reporting period.

The number of months taken for each case shall be computed as the number of days taken from the "start" date to the "end" date divided by 365 and multiply by 12 (rounded to 2 decimal places). The second step is to divide this aggregated number of months by the total number of cases where the "end" date for the case falls within the reporting period. The result is the average time taken from the "start" to the "end" of a MAP case in months (rounded to 2 decimal places).
