1. Represents the unweighted average of 25 Latin American and Caribbean countries included in this publication and excludes Cuba and Venezuela due to data issues.

In the OECD classification the term "taxes" is confined to compulsory unrequited payments to general government. Taxes are unrequited in the sense that benefits provided by government to taxpayers are not normally in proportion to their payments. <http://www.oecd.org/tax/tax-policy/oecd-classification-taxes-interpretative-guide.pdf>

Tax structures

Tax structure compared to the regional averages

Tax structure refers to the share of each tax revenue category in total tax revenues. The highest share of tax revenues in Uruguay in 2021 was derived from value added taxes / goods and services tax (27.0%). The second-highest share of tax revenues in 2021 was derived from social security contributions (24.2%).

1. Represents the unweighted average of 25 LAC countries included in this publication and excludes Cuba and Venezuela due to data issues. Ecuador is excluded from the LAC average for CIT and PIT revenue as a sufficient breakdown is not available.

2. Data for 2020 are used for the OECD average as the 2021 data are not available.

1. The revenue from taxes on income, profits and gains may not add up to the sum of revenue from personal income tax and corporate income tax due to revenue that could not be allocated to these categories.

2. In this country note, "other taxes" is calculated as total tax minus taxes on income, profits and capital gains, social security contributions, taxes on property and taxes on goods and services. It includes taxes on payroll and workforce, and other taxes (as defined in the OECD Interpretative Guide).

Tax revenue includes net receipts for all levels of government; figures in the chart and table may not sum to the total due to rounding.
