Evaluation

**TERMS OF REFERENCE**

**FOR AN**

**EVALUATION OF THE  
COMMISSION OF THE EUROPEAN UNION'S SUPPORT  
TO PRIVATE SECTOR DEVELOPMENT  
IN THIRD COUNTRIES**

**March 2011**

## **1. MANDATE**

Systematic and timely evaluation of its expenditure programmes is a priority for the European External relations services. It is key to account for the management of the allocated funds and for promoting a lesson-learning culture throughout the organisation. The focus is on the impact (effects) of these programmes against a background of greater concentration of external co-operation and increasing emphasis on result-oriented approaches, particularly in the context of the programmes of the EC External Relations<sup>1</sup>.

The 2011 evaluation plan, approved by the DG Development Commissioner, requested to undertake a second evaluation of EC support to private sector development in third countries after the first one related to the period 1994-2003.

The main objectives of the evaluation are:

- To provide the relevant external co-operation services of the EC and the wider public with an overall independent assessment of the Commission's past and current support to private sector development in third countries.
- To identify key lessons in order to improve the current and future strategies and programmes of the Commission.

## **2. THE POLICY AND IMPLEMENTATION BACKGROUND**

### **2.1. Policies and guidelines**

Article 177 of the Treaty of the European Union specifies that the development cooperation "shall foster:

- the sustainable economic and social development of the developing countries, and more particularly the most disadvantaged among them,
- the smooth and gradual integration of the developing countries into the world economy,
- the campaign against poverty in the developing countries.

All are linked to Private Sector<sup>2</sup> Development (PSD) with the recognition that poverty reduction cannot be generated sustainably by public actors only. The Commission's approach to support the development of the Business Sector in third countries are based on the communication COM (2003) 267<sup>3</sup>. Further to the conclusions and recommendations of the UN Conferences on Development Finance (Monterrey, March 2002) and on Sustainable Development (Johannesburg, September 2002). It stresses the "central role of the private sector in terms of growth, employment and trade integration". Taking into account that: (i) there was "a need to re-asses the role and the "modus operandi" of the Commission of the European Union (EC) in providing official (i.e. granted based) support; (ii) the various instruments should be rationalised and harmonised; (iii) the

---

1 Ex Directorates General of External Relations, (RELEX), Development (DEV) and the EuropeAid Co-operation Office (AIDCO).

2 In its communication COM (1998) 667 "An EC Strategy for private sector development in African Caribbean Pacific countries", the European Commission defines the private sector as: The sphere of economic activity where financial capital, physical is in the main privately owned and where business decisions are made as a result of private initiative in the context of markets which are in the main competitive.

3 This communication was under finalisation simultaneously to the implementation of the previous evaluation of PSD.

Commission must "focus its energy and resources on what it does the best", the EC identified five areas of interventions on which to base its business sector support:

1. Support to governments to improve the necessary regulatory framework, institution building related to PSD.
2. Investment and inter-enterprise co-operation promotion activities.
3. Facilitation of investment financing and access to financial markets, in general.
4. Support for Small and Medium- sized Enterprises (SMSEs) in the form of non-financial Services.
5. Support for micro-enterprises.

These areas encompass three levels of intervention:

- The macro level, focused on the partner country governments in order to create conducive environment for business and investment.
- The meso level, addressing their supporting institutions: intermediary organisations and markets in order to deliver financial and non financial services to enterprises while participating in the reform and acting as lobbies.
- The micro level, consisting in direct support to SMSEs in the sub-sectors of urban and rural economy (value-added, trade, services, including agribusiness).

A new Communication is currently under preparation and the Commission expects to adopt it by the end of 2011.

Further to the communication COM (2003) 267, the EC services issued documents linked to PSD.

The Guidelines for European Commission Support to Private Sector Development (February 2003; shorter version 2005)

Following a peer review undertaken in 2003 as between donors, with the assistance of CGAP (Consultative Group to Assist the Poor), the donor group in the area of microfinance, EC approaches have been revised, laid down in the Guidelines for EC support to microfinance 2008;

Finally, a comprehensive revision of the above mentioned Guidelines for European Commission Support to Private Sector Development and the 2003 EC Guidelines on Trade related assistance was carried out over 2009/2010 and led to the adoption of a new comprehensive guidance document on Trade and Private Sector Policy and Development Support programmes financed by EU external assistance – Tools and Methods Series – Reference Document N° 5 (December 2010).

These documents, based on experience, are designed as tools for staff responsible for preparing and implementing PSD projects and programmes.

## **2.2. Instruments and implementation**

Presently, external action is mainly based on three main legislative instruments (European Development Fund (EDF), European Neighbourhood and Partnership Instrument (ENPI) and Development Cooperation Instrument (DCI) the latter including as well thematic instruments.

The European Development Fund (EDF) is the main instrument for providing EC development aid in the African, Caribbean and Pacific (ACP) countries and the overseas countries and territories (OCTs). It has three components: grants managed directly by the Commission or through decentralised management; risk capital and loans to the private sector, managed by the European

Investment Bank under the Investment Facilities; FLEX mechanism, aiming at remedying the adverse effects of instability of export earnings.

The European Neighbourhood and Partnership Instrument (ENPI) supports the European Neighbourhood Policy (ENP). Operational since 1 January 2007, it represents the strategic continuity with enlarged objectives of the former cooperation programmes TACIS (for the Eastern European countries) and MEDA (for the Mediterranean countries).

The Development Co-operation Instrument (DCI), also applicable since 1 January 2007, replaces a wide range of geographic and thematic instruments and covers three components:

- 1) Geographic programmes supporting cooperation with 47 developing countries in Latin America, Asia and Central Asia, the Gulf region (Iran, Iraq and Yemen) and South Africa.
- 2) Thematic programmes benefiting to all developing countries (including those covered by the ENPI and the EDF). These programmes support actions in the following fields: Investing in people; Environment and sustainable management of natural resources including energy; Non-state actors and local authorities in development; Food security; migration and asylum.
- 3) Programme of accompanying measures for the 18 ACP Sugar Protocol countries, in order to help them adjust following the reform of the EU sugar regime.

All these instruments and programmes are used to implement PSD. The main activities are listed below:

### **To support the business environment and the public-private dialogue**

**The ACP Business Climate (BizClim).** This Private Sector Enabling Environment Facility (PSEEF), which is an EU funded initiative under the Cotonou Agreement seeks to enhance the business environment of African, Caribbean and Pacific (ACP) countries and regions by providing technical assistance to: a) Promote the Public-private dialogue providing assistance to governments and intermediary organisations representative of the business community; (b) Empower key stakeholders in undertaking business environment reforms and creating more favourable business and investment conditions; (c) Assist Regional Economic Communities in the design of regional programmes in the field of private sector development; (d) Stimulate the reflection and the transfer of information among our ACP partners through the organisation of workshops and conferences on relevant topics and through the creation of an online data-base to disseminate results. Within Bizclim II, support is provided to **the EU-Africa Business Forum** whose role is defined in the Joint EU-Africa Strategy (JEAS) under the 3<sup>rd</sup> partnership on trade, regional integration and infrastructure. It aims to bring together entrepreneurs and public and private investors from both Europe and Africa in order to discuss ways of improving the investment and business climate and to raise the profile of doing business in Africa.

**FEMISE** (Forum Euroméditerranéen des Instituts de Science Economique) research network. It aims to follow the progress of the Mediterranean partner countries with respect to free trade and cooperation; to encourage the dissemination of economic information and research on these topics; to stimulate economic research.

**The Asia-Europe Business Forum (AEBF)** is a meeting of business leaders, created to strengthen economic co-operation between the business sectors of Asia and Europe. The AEBF develops recommendations that are addressed to the governments of the Asian and European countries participating in the ASEM (Asia-Europe meeting) process. The recommendations aim at enhancing

economic co-operation between the two continents, based on the experience and knowledge of business leaders

### **To support Small and Medium Enterprises (SMEs), Service Providers and Intermediary Organisations, including financial services**

**CDE (Centre for the Development of Enterprise).** CDE was created in 1977 and was formerly known as CDI (Centre for the development of Industry). Its mandate was revised under Cotonou to include a stronger focus on programmes and sectors instead of logistical support to trade fairs. The second revision of the Cotonou agreement enlarges the CDE's mandate, including reference to the EPA implementation and regional integration. It also includes a significant improvement in the governance of the institution, simplifying the decision-making process. CDE supports the implementation of private-sector development strategies in the ACP countries by providing non-financial services to ACP companies and businesses and support to joint initiatives set up by economic operators of the Community and the ACP States (Cotonou Agreement, Annex III, art. 2.1). In this regard, due account shall be given to the needs arising from the implementation of the Economic Partnership Agreements. This support is predominantly provided through a pro-active and programmed approach to selected sub-sectors and groups of SMEs in selected countries and regions.

**PROINVEST.** The purpose of the Programme is to promote, on a regional basis, sustainable and environmentally friendly investment and inter-enterprise co-operation agreements (I&ICAs) in key sectors to increase the competitiveness of the ACP economies. This includes strengthening the role of Investment Promotion Agencies (IPAs), intermediary private organisations and providers of investment-related business services. The Programme supports those sectors and EU-ACP investments and partnerships which will contribute to the attainment of wider social objectives of ACP countries.

#### **EC Investment facilities with:**

- EIB Investment Facility for Small and Medium Enterprises and foreign direct investment in ACP countries. It provides various forms of risk sharing financing instruments to most sectors of the economy for projects which are economically, financially, technically and environmentally viable;
- Facility for Euro-Mediterranean Investment and Partnership (FEMIP) brings together the whole range of services provided by the EIB to assist the economic development and the integration of the Mediterranean partner countries;
- Neighbourhood Investment Facility has been designed to create a "partnership" bringing together grants from the European Commission and the EU Member States with loans from European public Finance Institutions as well as own contributions from the ENP partner countries. It includes support the private sector particularly through risk capital operations targeting Small and Medium Enterprises;
- Latin American Investment Facility (LAIF) is a financing mechanism aiming at mixing grants (from the EC and other donors) with loans of multilateral or bilateral public European Development Finance Institutions and Regional Latin American Banks. It includes the promotion of an equitable and sustainable socio-economic development through support for the small and medium enterprises;

## **To support the development of private sector through programmable funds**

The **NIPs (National Indicative Programme)** and the **RIPs (Regional Indicative Programme)** contain numerous activities to support the private sector. This support is provided by classical projects and programmes, and in certain cases by general and/or sector budget support operations.

### **3. PURPOSE AND SCOPE OF THE EVALUATION**

#### **3.1. General aspects**

The evaluation will cover the Commission's actions in the field of Private sector development as set out in the different legal bases.

The purpose of the evaluation is to draw key relevant lessons and provide recommendations pertaining to the overall EC support through PSD. Although the evaluation does not aim at evaluating each of the different instruments / programmes concerned, information will be drawn, where relevant, from the different instruments/programmes to reach conclusions and recommendations with respect to the overall objectives of EC policy support to PSD. Consequently, one should have information on the contribution of each instrument / programme should to the achievement of the objectives of the EC policy support to PSD.

If temporally possible, the outputs (findings, conclusions and recommendations) will feed the formulation of the new Communication on PSD.

To build on the previous evaluation on the same topic (1994-2003), **it shall cover aid delivery over the period 2004 – 2010.**

On the period, the total amount on Trade, PSD and Microfinance is approximately €2.865.000.000. The amount only for PSD will be detailed with the evaluation (see herunder 4.1.1. Inventory).

The activities evaluated are those under the responsibility of the Directorate General for Development and Co-operation – EuropeAid / DEVCO (ex. Directorates General for External relations, for Development and the EuropeAid Co-operation office). All regions where EC co-operation is implemented are included in the scope of this evaluation (with the exception of regions and countries covered by the enlargement mandate).

The evaluation shall assess to what extent the Commission assistance has been **relevant, coherent, effective, efficient and sustainable in providing the expected impacts** along with the **EC added value of interventions mainly at EU level**. It should also assess the **coherence**<sup>4</sup> with the relevant EC policies and the partner Governments' priorities and activities.

The evaluation should be **forward looking**, providing lessons and recommendations for the continued support of the PSD.

The preliminary mapping (see Desk phase/Inception report) of EC activities will provide an inventory of EC support to the PSD.

---

<sup>4</sup> Definition of Coherence: the extent to which the intervention logic is not contradictory/the intervention does not contradict other intervention with similar objectives

The evaluation should come to a **general overall judgement** of the extent to which Commission strategies and aid modalities have contributed to the achievement of the objectives and intended impacts, based on the answers to the agreed **evaluation questions**.

The evaluation shall lead to **conclusions** based on objective, credible, reliable and valid findings and provide the EC with a set of operational and useful **recommendations**.

The evaluation should support policy decision-making and project management purposes. The main users of the evaluation will be the EEAS, DG DEVCO and the EU Delegations. Other EC services may also benefit from the results of this evaluation. The evaluation should also generate results of interest to a broader audience, including governments of partner countries, Member States, Non State Actors (mainly private sector and its organisations) and others.

The evaluation will include a comprehensive desk phase followed by a field phase with missions to **9 different countries due to the diversity of the contexts and interventions**. The choice of the countries will be done upon selection criteria that will be defined taking into account geographical representation and the approach to sector analysis, in consultation with the Reference group taking also into account, whenever relevant, findings of previous evaluations, indicated in the table at the following address:

[http://ec.europa.eu/europeaid/how/evaluation/evaluation\\_reports/documents/tbl\\_sect\\_cov\\_en.pdf](http://ec.europa.eu/europeaid/how/evaluation/evaluation_reports/documents/tbl_sect_cov_en.pdf)

The evaluators shall identify and formulate in-depth questions and test hypotheses for the field phase addressing relevance, coherence, effectiveness, efficiency, impact, and sustainability of aid delivery, including EC added value<sup>5</sup> and complementarity with the Member States and other donors.

### **3.2. Specific aspects**

The evaluation should be based on a comprehensive inventory of all the EC's interventions in the sector of PSD during the evaluation period.

The evaluation should then be built around a testing and a verification of the logic and consistency of individual actions against stated objectives and anticipated impacts. If need be, several logical diagrams should be built in relation with the major differences seen in approach between the different regions.

The analysis should include the quality and impact of PSD policy dialogue and accompanying policy actions; the impact of Commission assistance in relation to economic and social development goals; the degree of attention given to relevant cross-cutting<sup>6</sup>, and the relevance and efficiency of instruments, working practices and financial mechanisms.

---

<sup>5</sup> The criterion is closely related to the principle of subsidiarity and relates to the extra-benefit the activity/operation generates due to the fact that it was financed/implemented through the EC. There may be three practical elements to illustrate possible aspects of the criterion:

- 1) The EC has a particular capacity on specific issues above those of the Member States;
- 2) The EC has a particular mandate in the framework of the '3Cs' and can draw member states to a greater effort together;
- 3) EC cooperation is guided by a common political agenda embracing all Member States.

<sup>6</sup> The Consultants have to provide a well argued proposal, highlighting which cross-cutting and key issues they recommend the evaluation to focus on. Cross-cutting issues are those of the European Consensus on Development (Article 101): Human rights; Gender equality; Democracy; Good governance; Children's rights; Indigenous people's rights; Environment sustainability; Combating HIV/AIDS.

The evaluation should assess the steps being taken by the Commission to improve the relevance and coherence in regard to programming, targeting and setting up the instrument chosen during the evaluation period.

As the evaluation should contribute to improved coherence, it should test the given if the scope and the framework of the EC interventions in Private Sector Development correspond to the objectives of external cooperation as laid out in the COM (2003) 267 and the Lisbon Treaty<sup>7</sup>.

It should assess the Commission of the European Union's co-operation activities in PSD, relative to the general and specific objectives of the different regional and country co-operation and development programmes and whether the partner countries development strategies have been taken into account both in the EC's policies and their implementation.

In particular, and for the least developed countries, the evaluation should assess how the EC has responded to the countries having included economic growth into their Poverty Reduction Strategy.

It should assess the coherence of the EC's policy and interventions and the other EU policies which may have consequences on the private sector development in partner countries (the coherence of the "3 Cs"). The evaluation should also consider the coordination and complementarity of activities managed by the EIB and with the Member States interventions (the coordination of the "3 Cs") without evaluating them.

The evaluation should also give information on whether and how the recommendations of the previous evaluation have been taken into account:

[http://ec.europa.eu/europeaid/how/evaluation/evaluation\\_reports/2005/951656\\_docs\\_en.htm](http://ec.europa.eu/europeaid/how/evaluation/evaluation_reports/2005/951656_docs_en.htm)

Finally, the evaluation should consider possible effects of Private Sector Development on the Poverty reduction and on the progress toward the achievement of the Millenium Development Goals, mainly those related to Goal 1 (Eradicate extreme poverty and hunger) and 3 (Promote gender equality and empower women).

### **3.3. Additional information on the scope**

Despite Trade-related assistance and Private sector support being linked, both from the enterprise and policy perspectives, trade issues do not fall under the scope of this evaluation. A "**Thematic Global Evaluation of Commission of the European Union's support to Trade-Related Assistance in Third Countries**" is currently on going. Its end is foreseen by mid 2012.

Another evaluation directly linked to this evaluation is the **Evaluation of the Centre for the Development of Enterprise (CDE)**. The evaluation will review the overall performance of CDE. It will review the portfolio in terms of project financing volumes (approvals, signatures and disbursements), by sector and by country/region, as well as technical assistance. The evaluation will base its conclusions on a review of the performance (effectiveness, efficiency) of CDE operations, both as originally set within the Cotonou Agreement as well as defined by the specific annual budgets and work programmes. The exercise will make sure that the recommendations of the evaluation take due account of the current strategy, specifying to what extent conclusions on the activities of the 2005-2010 period may also apply to expected results pursued by the current strategy. It must also assess whether the tools the Centre uses allow measuring the outputs of the

---

<sup>7</sup> It should include the social economy (cooperatives).

Centre's activities in the field. The evaluation is to start in February 2011. The final report is foreseen by August 2011.

The outputs (intermediate and final) of the CDE evaluation should feed into the PSD evaluation which must give information at the impacts level.

An evaluation of the EU/ACP Micro-finance Framework Programme interventions of the EC in **Microfinance**<sup>8</sup> will start in March and will be completed in the second half of 2011. All available intermediate information related to it should feed into the PSD evaluation.

Consequently, the evaluation team will have to be in close relation with the evaluation teams of those three previous evaluations.

As regards Investment Facilities being an external mandate of the EC, they are out of the scope as such. Nevertheless their complementarity with the EC interventions must be analysed.

#### 4. METHODOLOGY AND APPROACH

The overall methodology guidance is available on the web site of the Evaluation Unit under the following address: [http://ec.europa.eu/europeaid/how/evaluation/methodology/index\\_en.htm](http://ec.europa.eu/europeaid/how/evaluation/methodology/index_en.htm)

Within 14 days after the reception of the ToR, the Consultants will present a **launch note** which should contain:

- their understanding of the ToR;
- a methodological note on provisions of the quality control;
- the provisional composition of the evaluation team with CVs<sup>9</sup>;
- a proposed budget<sup>10</sup>.

Following the launch note, the main key deliverables are:

- The inception meeting;
- The inception report;
- The desk report;
- The final report;
- The dissemination seminar in Brussels.

All the relevant documentation, which is available on DEVCO Intranet address, will be made available by the Evaluation Unit.

The consultants are invited to critically use all the available literature/studies/results (partial or completed, official or unofficial) done so far on the subject if they consider it can be useful for the redaction of the report.

---

<sup>8</sup> Microfinance is the supply of small loans, savings, and other basic financial services to the poor (i.e., people who are not reached by the traditional/formal banking sector). While originally there was a focus on provision of loans (microcredit) alone, there is increasingly a recognition that poor people, like everyone else, also have savings and need other financial services – such as money transfer services or insurance – to run their businesses, increase income, build assets, and reduce their vulnerability to economic stress (EuropeAid: What is microfinance?). It should be noted that most microfinance products and services are designed for poor households rather than microenterprises and smallholders. Micro-loans and similar products are often not fully tailored to supporting productive activities. The latter often need more advanced forms of SME finance and agricultural finance.

<sup>9</sup>All birthday dates must be written in the following Format: dd/mm/yyyy

<sup>10</sup> In the frame of a "framework contract"

The evaluation basic approach consists of **5 phases**, subdivided in **subsequent methodological stages** (phases for which consultant contribution is requested are marked in grey).

<i>Five Main Phases of Development:</i>	<i>Methodological Stages:</i>
1. Preparation Phase	§ Reference group constitution § ToR drafting
	§ Launch Note
2. Desk Phase 3. Field Phase 4. Synthesis phase	§ Structuring of the evaluation § Data Collection and inventory § Verification of hypotheses § Analysis § Judgements on findings
5. Feedback and Dissemination	Dissemination Seminar in Brussels
	§ Quality Grid § Summaries § Evinfo (summary for OECD and Commission databases) § <i>Fiche contradictoire</i> (a statement of key recommendations followed by the Commission's response)

#### **4.1. Desk phase**

##### *4.1.1 Inception report*

Following the approval of the *Launch Note* by the Evaluation Unit, the work will proceed to the structuring stage which shall lead to the production of an *Inception Report*.

The *Inception report* will be divided into two parts.

- The first part (inventory) will contain the complete overview of EC interventions (contracted and disbursed amounts) and their typology. This overview will also include all relevant Budget Support operations (both General budget support and Sector budget support). The related database will form integral part of the inventory.

Different sources must be use to build a robust mapping and typology:

- an exhaustive list of interventions for the centralised operations (PROINVEST, BIZCLIM, CDE, African Economic Outlook, EU-ACP Microfinance Framework Programme, etc.) to be provided by the EC services in charge of the follow up of these programmes, under request of the evaluators;
- a table of commitments (Trade, PSD and Microfinance) on centralised operations, interventions financed through the NIPs and the RIPs, and all other instruments provided by the EC service in charge of the support to PSD.
- an exhaustive OECD/DAC table on all the commitments on Trade, PSD and Microfinance.
- an exhaustive table on budget support (GBS and SBS) interventions (commitments) from 2004 to 2010 to be provided by the EC service in charge of the support to PSD.

These tables should be used as basis to make the exhaustive inventory on contracts and disbursements with a research on the CRIS data base.

**The Units DEVCO/E/2 and DEVCO/C/4 will be responsible to provide all the basic missing data.**

- The second part of the inception report will consist of the analysis of all relevant key documents, including the relevant policy, programming documents and agreements. On the basis of the information collected, the evaluators will:
  - (1) **Reconstruct the intervention logics** of the EC aid to support PSD, by producing strategies, impact diagrams relevant for the evaluated period and the different geographic sub-areas;
  - (2) Present a **preliminary set of evaluation questions (EQ)** together with judgement criteria for each EQ and provisional indicators for each of the proposed judgement criteria;
  - (3) Propose a set of rational criteria for selection of the field phase studies. Upon the defined criteria, justify the choice of a set of countries covering the diversity of the EC interventions and of partners countries, which would be examined in detail during the desk phase. Out of this sample, at the end of the Desk phase, **9 countries** will be selected for the field phase of the evaluation. All the specific aspects of the intervention logic for each selected country are to be highlighted;
  - (4) Specify the **methodological tools** that will be used for the desk (including the "questionnaires", if foreseen) and the field phase;
  - (5) Present the approach to ensure **quality assurance** throughout the different phases of the evaluation;
  - (6) Present a detailed **work plan**, specifying the organisation and time schedule of the evaluation process;

The Contractor will present the *Inception Report* to the Evaluation Unit. The Reference group will comment on the *Inception Report* and validate the Evaluation Questions. The final version of the *Inception Report* shall be formally approved by the Evaluation Unit before initiating the desk phase.

#### *4.1.2 Desk phase report*

Upon approval of the *Inception Report*, the team of consultants will proceed to the Desk Phase of the evaluation.

The desk report takes up the points dealt with in the inception report and goes into as much detail as necessary. In this stage, consultants are asked to:

- (1) Present a final set of **evaluation questions** along with appropriate **judgement criteria** and relevant quantitative and qualitative **indicators**;
- (2) Present the methodology for **data and information collection and their limitations** both for the Desk phase and for the Field phase;
- (3) Present the **methods of analysis** of the information and data collected in order to draw findings enabling to draw general conclusions; due to the difficulty of this exercise any limitation should be made explicit;

- (4) Present the way to come to **judgements** that directly relate to the judgement criteria, though adaptable should the field findings require doing so;
- (5) Present the **preliminary findings related to the evaluation questions** and the first hypotheses to be tested in the field based on the specific methods identified in the *Inception Report*;
- (6) Present the set of **9 countries and selection criteria, methodology and tools for the field phase**.

At the completion of this work, the evaluation team will present a *Desk Phase Report* setting out the results of this first phase of the evaluation including all the above listed tasks<sup>11</sup> (the core part of the *Inception Report* will be annexed to the *Desk Phase Report*). The RG will comment on the *Desk Phase Report* and the necessary amendments will be specified. Formal approval of this report is to be made by the Evaluation Unit, before the field visits.

## 4.2. Field phase

Following satisfactory completion of the Desk Phase, the evaluation team will proceed to the field missions.

The fieldwork shall be undertaken on the basis set out in the *Final Desk Phase Report*. Any significant change from the agreed methodology and/or schedule which proves to be necessary, needs to be preliminarily and officially approved by the Evaluation Unit.

Prior completion of each country visit, the Evaluation team shall prepare, for the EC Delegation concerned, a **debriefing of the field mission**, seeking to validate the data and the information collected.

Following completion of the field mission, the team will prepare a **country note**<sup>12</sup> **for each country visited**, to be submitted to the Evaluation Unit within 10 (ten) working days after returning from the field. These notes will be annexed to the *Final Report*. Following the carrying out of all field missions and prior starting the Final report phase, the Evaluation team shall present results of the field phase during a detailed debriefing to the Reference Group, with support of a Power point presentation.

## 4.3. Final reports and seminar

### 4.3.1. The Draft Final Report

The Consultants will submit the *Draft Final Report* in conformity with the structure set out in annex 3. Comments received during de-briefing meetings with the Delegations and the RG must be taken into consideration.

The Consultants may either accept or reject the comments but in case of rejection they must justify (in writing and in detail) the reasons for rejection. The comments and the Consultants' responses are annexed to the report. If the Consultants do not want to include these comments in the report, they must explain, in a separate document, the reasons why.

---

<sup>11</sup> All the databases produced for this aim will be integral part of the document.

<sup>12</sup> See annex 2.

If the evaluation manager considers the report to be of sufficient quality (see annex 4), he/she will circulate it for comments to the reference group. The RG will meet to discuss the *Draft Final report* in the presence of the evaluation team.

The evaluation team with the support of a Power point presentation (for every question 4-5 slides) will explain:

- The theory of action (part of the intervention logic concerned) with the localisation of the EQ;
- One table with Judgement criteria and indicators;
- Findings (related to JC and Indicators) and their limits;
- Conclusions and recommendations.

#### 4.3.2. *The Final Report*

The Consultants will prepare the *Final Report* taking into account comments from the reference group, the Delegations and the evaluation manager. The final report will be in **English**, the executive summary (5 pages) will be translated into **French** and **Spanish**.

The **Final Report** (including the executive summary in the three linguistic versions and all annexes) shall be sent to the Evaluation Unit in electronic version.

The contractor shall also submit a **methodological note** explaining how the quality control and the capitalisation of lessons learned have been addressed.

The Evaluation Unit makes a formal judgement on the quality of the evaluation (annex 4).

The evaluation shall lead to **conclusions** based on objective, credible, reliable and valid findings and provide the EC with a set of operational and useful **recommendations**<sup>13</sup> **that** must be:

- Linked to the conclusions;
- Clustered, prioritised and targeted at specific addressees;
- Useful and operational;
- If possible, presented as options associated with benefits and risks.

The final version of the *Final Report* shall be presented in a way that enables publication without any further editing.

#### 4.3.3 *The Seminar*

The final report will be presented at a seminar in Brussels. The purpose of the seminar is to present the results, the conclusions and the recommendations of the evaluation to all main stakeholders concerned (EC services, Member States, Members of the European Parliament, representatives of the partner countries, the private sector and civil society organisations and other donors).

The Consultant shall prepare a Power point presentation for the seminar. This presentation shall be considered as a product of the evaluation in the same way as the reports and the data basis. This presentation will include slides on:

- Context of the evaluation

---

<sup>13</sup> In that sense, the evaluation should be forward looking, meaning that it will draw lessons and recommendations based on the evaluation of the past support. It is however not a strategic advice exercise, nor an ex ante evaluation so it does not aim at “improving current interventions” or having a judgment on specific interventions.

- Intervention logic and focus of questions
- Answers to the evaluation questions
- Conclusions and
- Recommendations

For the seminar the Consultant shall deliver **200 copies** of the Final Report (including the executive summary in the three linguistic versions) **out of which 30 copies with full printed annexes**.

The Consultant shall deliver to the Evaluation unit the drafting *minutes of the seminar*.

#### 4.4. Dissemination and follow-up

Following the approval of the *Final Report*, the evaluation manager will proceed to the disseminating of the results (conclusions and recommendations) of the evaluation: (i) make a formal judgement on the evaluation using a standard quality assessment grid (see Annex 4); (ii) prepare an Evaluation Summary following the standard DAC format (EvInfo); (iii) prepare and circulate a three-column *Fiche Contradictoire* (FC). The FC is prepared by the Evaluation Unit in order to ensure feedback from the evaluation and an active response from the Commission services. All three documents will be published on the Web alongside with the *Final Report*.

The Evaluators will be required to assist in dissemination and follow-up activities. In co-ordination with the Evaluation Unit, they shall present the conclusions and recommendations during the seminar in Brussels (see point 4.3.3) and to participate to a maximum of two working groups, also in Brussels.

### 5. IDENTIFICATION OF THE EVALUATION QUESTIONS/ISSUES

The evaluation will be based upon a set of key evaluation questions which are intended to give a more precise and accessible form to the evaluation criteria and to articulate the key areas of interest of EC services, thus optimising the focus and utility of the evaluation.

Assessments will be done on the following seven criteria: relevance, impact, effectiveness, efficiency, sustainability, coherence and the EC added value. The first five correspond to the traditional practice of evaluation of development aid and have been formalised by the OECD (DAC). The last two apply to all EC policies. The criteria will be given different weight depending on the priority accorded to the evaluation questions.

In general, questions (to a maximum of 10) will refer to the following main evaluation criteria and topics:

- ***Relevance of the strategy/programme:*** this includes both relevance to the general objectives of the EC and relevance to commitments on an international level the EC has itself committed to.
- ***Consistency of the implementation in relation to the strategy:*** the Consultants shall verify the extent to which the work plan, schedule and implementation of the activities (all types of interventions, geographical and sector distribution, instruments, and aid delivery channels included) were consistent with the strategy set out in the Action plans. They shall demonstrate who were the real beneficiaries, direct or indirect, of the intervention and compare them to the target population(s) in the Action plans.

The Consultants will also verify the extent to which the intervention modalities (instruments, aid delivery channels, etc.) were appropriate to the objectives.

- **Achievement of main impacts/effects:** the Consultants shall identify all recorded results and impacts, including any unintended ones, and compare these to the intended results and/or impacts. The Consultants will also identify the changes, which occurred in the areas in which EC programmes were supposed to produce an impact
- **Efficiency of the implementation:** for the activities which were effective, it will be necessary to question to what extent funding, human resources, regulatory and/or administrative resources contributed to, or hindered the achievement of the objectives and results.
- **Sustainability of the effects:** an analysis of the extent to which the results and impacts are being, or are likely to be maintained over time.
- **Key cross-cutting issues:** for example gender, environment and climate change, human rights, etc. Verification should be undertaken, on the one hand, of the extent to which account has been taken of these priorities in the programming documents and, on the other hand, to what extent these issues have been reflected in the implementation modalities and in the effects of the intervention. **The 3Cs (co-ordination, complementarity and coherence):** co-ordination / complementarity with EU Members States and other donors; coherence with EU policies (including the Member States' own policies and eventual interventions of the EIB).
- **Value added of the EC interventions:** The criterion is closely related to the principle of subsidiarity and relates to the extra-benefit the activity/operation generates due to the fact that it was financed/implemented through the EC.

The evaluation questions should also reflect particular interests from the EC services represented in the Reference Group.

## 6. MANAGEMENT AND SUPERVISION OF THE EVALUATION

The responsibility for the management and supervision of the evaluation will rest with the Evaluation Unit of the Directorate General for Development and Cooperatoin - EuropeAid. The progress of the evaluation will be followed closely by the Reference Group members.

The RG will act as the main interface between the Evaluation Team and the Commission Services. **The principal function of the Reference Group** is to follow the evaluation process and more specifically:

- to advise on the scope and focus of the evaluation and the elaboration of the Terms of Reference;
- to act as the interface between the consultants and the Commission services;
- to advise on the quality of the work of the consultants;
- to facilitate access to information and documentation;
- to facilitate and assist in feedback of the findings and recommendations from the evaluation.

Several Reference Group meetings (about 5) will take place during the process of the evaluation, as indicated below in a time schedule.

## 7. EVALUATION TEAM

This evaluation is to be carried out by a team with advanced knowledge of, and experience in Development co-operation in general and, in at least the following fields: development co-operation policy, macroeconomics, private sector development, SME promotion and finance, investment

promotion, business, agro-economy, institutional and social development (including governance and gender expertise).

Consultants should also possess an appropriate training and documented experience in the various EC aid implementing modalities, including budget support. The team should comprise consultants familiar with the different regions covered by the EC's interventions.

At least the Team Leader shall have proved experience in EC evaluation methodology and considerable experience in managing evaluations of a similar size and character. The team as a whole should possess an appropriate training and documented experience in the management of evaluations as well as evaluation methods in field situation. It is recommended that consultants from beneficiaries countries be employed (particularly, but not only, during the Field Phase).

The Team must be prepared to work in **English**, and possess excellent drafting skills. Knowledge of **French** and **Spanish**, particularly for the field phase, is required.

It is also strongly recommended that some consultants involved in the CDE (and Microfinance) evaluation are part of the evaluation team.

The agreed Team composition may be subsequently adjusted if necessary in the light of the final Evaluation Questions once they have been validated by the Reference Group.

Consultants must be strictly neutral. A declaration of absence of conflict of interest should be signed by each consultant and annexed to the launch note. For experts hired subsequently the signature of the contract or any change that may incur within the team composition, a declaration of absence of conflict of interest shall be sent to the Evaluation unit.

## 8. TIMING

The evaluation shall start in March 2011, the completion of the *Final report* is scheduled for September 2012. The structuring phase must be approved before the summer break (end of June).

The indicative framework below has to be filled by the Consultants.

<i>Evaluation Phases and Stages</i>	<i>Notes and Reports</i>	<i>Dates</i>	<i>Meetings</i>
Terms of Reference		March 2011	
Starting Stage	Launch Note	March 2011	
<b>Desk Phase</b>			
Structuring Stage	Inception Report		RG meeting
Desk Study	Draft Desk Report		RG meeting
	Final Desk Report		
<b>Field Phase</b>			
	Presentation for the RG (including final notes on case studies)		RG meeting
<b>Final Report-Writing Phase</b>			
	Draft Final Report		RG meeting
	Final Report	September 2012	
<b>Dissemination Seminar</b>		October 2012	

The final timing accepted will be annexed to the contract signed.

## **9. COST OF THE EVALUATION AND PAYMENT MODALITIES**

The overall cost includes the **evaluation** as such.

The total of this must not exceed **€600.000**.

According to the service contract, payments modalities shall be as follow:

30% at the acceptance of the *Inception Note*, plus 2.5% of the agreed budget to be used for quality control;

50% at acceptance of *Draft Final Report*;

20% at acceptance of *Final Report*.

The invoices shall be sent to the Commission only after the Evaluation Unit confirms in writing the acceptance of the reports.

Seminar related costs are to be invoiced and paid separately.

<sup>14</sup> It should be noted that not all microfinance-related activities are directly relevant to PSD.

### ANNEX 3. GUIDANCE ON THE COUNTRY NOTES FOR THE FIELD PHASE

*Length: The country note should be maximum 20 pages (excluding annexes).*

This evaluation is partly based on a number of country studies to be carried out during the field phase. The field phase will enable the evaluation team to gather information on the EC support (to the sector/theme of the evaluation) at country level on the bases of hypotheses to be tested, which together with the desk phase findings should feed the global assessment within the synthesis report. The country notes are required for transparency reasons, i.e. to clearly account for the basis of the evaluation, and also to be able to have a factual check with the concerned EC Delegations and other stakeholders.

This reporting should be seen as building blocks for the evaluation and as documents to be circulated with the Reference Group and the Delegations involved. In the end of the evaluation the country notes will be published as part of the overall evaluation exercise in annexes to the synthesis report (thus editing is required). These notes should be prepared after the missions, they should respect the agreed structure and they should go further than the oral presentations conducted at the end of the missions. Furthermore, the evaluation questions are formulated to be answered on the global level using the whole information collected from the different country studies and the desk study, and should hence not be answered at the single country level.

Indicative structure:

1. Introduction:
  - The purpose of the evaluation;
  - The purpose of the note;
  - The reasons for selecting this country as a case study country.
2. Data collection methods used (its limits and possible constraints).
3. Short description of the national context linked to the EQs and the PSD process with the country.
4. Findings (focused on facts and not going into analysis).
5. Conclusions covering the elements confirming or not confirming the desk phase hypotheses taking into account the specificities of the given country.

Annexes shall include relevant information referring to the tools used (not exhaustive list):

The list of people interviewed;

- The list of documents consulted;
- The list of the projects and programmes specifically considered;
- Any database produced;
- ROM data;
- All questionnaires;
- Acronyms and abbreviation;
- Etc.

## ANNEX 4. OUTLINE STRUCTURE OF THE FINAL EVALUATION REPORT

*Length:* The overall length of the final evaluation report should not be greater than 60 pages (including the executive summary). Additional information on overall context, programme or aspects of methodology and analysis should be confined to annexes (which however should be restricted to the important information).

### 1. Executive Summary

*Length: 5 pages maximum*

This executive summary must produce the following information:

- 1.1 – Purpose of the evaluation;
- 1.2 – Background to the evaluation;
- 1.3 – Methodology;
- 1.4 – Main conclusions;\*
- 1.5 – Main recommendations.\*

*\* Conclusions and recommendations must be ranked and prioritised according to their relevance to the evaluation and their importance, and they should also be cross-referenced back to the key findings. Length-wise, the parts dedicated to the conclusions and recommendations should represent about 40 % of the executive summary*

### 2. Introduction

*Length: 5 pages*

- 2.1. Synthesis of the Commission's Strategy and Programmes: their objectives, how they are prioritised and ordered, their logic both *internally* (ie. the existence – or not – of a logical link between the EC policies and instruments and expected impacts) and *externally* (ie. Within the context of the needs of the country, government policies, and the programmes of other donors); the implicit assumptions and risk factors; the intended impacts of the Commission's interventions.\*
- 2.2. Context: brief analysis of the political, economic, social and cultural dimensions, as well as the needs, potential for and main constraints.\*
- 2.3. Purpose of the Evaluation: presentation of the evaluative questions

*\* Only the main points of these sections should be developed within the report. More detailed treatment should be confined to annexes*

### **3. Methodology**

*Length: 10 pages*

In order to answer the evaluative questions a number of methodological instruments must be presented by the consultants:

- 3.1. Judgement Criteria: which should have been selected (for each Evaluation Question) and agreed upon by the steering group;
- 3.2. Indicators: attached to each judgement criterion. This in turn will determine the scope and methods of data collection;
- 3.3. Data and Information Collection: can consist of literature review, interviews, questionnaires, case studies, etc. The consultants will indicate any limitations and will describe how the data should be cross-checked to validate the analysis.
- 3.4. Methods of Analysis: of the data and information obtained for each Evaluation Question (again indicating any eventual limitations);
- 3.5. Methods of Judgement

### **4. Main Findings and Analysis**

*Length: 20 to 30 pages*

- 4.1. Answers to each Evaluative Question, indicating findings and conclusions for each;
- 4.2. Overall assessment of the EC Strategy. This assessment should cover:
  - Relevance to needs and overall context, including development priorities and co-ordination with other donors;
  - Actual Impacts: established, compared to intended impacts, as well as unforeseen impacts or deadweight/substitution effects;
  - Effectiveness in terms of how far the intended results were achieved;
  - Efficiency: in terms of how far funding, personnel, regulatory, administrative, time and other resource considerations contributed or hindered the achievement of results;
  - Sustainability: whether the results can be maintained over time;
  - EC value added.

### **5. A Full Set of Conclusions and Recommendations**

*Length: 10 pages*

A Full set of Conclusions\* and Recommendations\* (i) for each evaluation question; (ii) as an overall judgement. (As an introduction to this chapter a short mention of the main objectives of the country programmes and whether they have been achieved )

*\*All conclusions should be cross-referenced back by paragraph to the appropriate findings. Recommendations must be ranked and prioritised according to their relevance and importance to the purpose of the evaluation (also they shall be cross-referenced back by paragraph to the appropriate conclusions).*

Annexes should include logical diagrams of EC strategies; judgement criteria forms; list of the projects and programmes specifically considered; project assessment fiches; list of people met; list of documentation; Terms of Reference; any other info (also in the form of tables) which contains factual basis used in the evaluation; etc.

- Power point presentation with 4 slides for each evaluation questions illustrating in a synthetic and schematic way the evaluation process: 1<sup>st</sup> slide) logical diagram with the evaluation question, 2<sup>nd</sup> slide) judgment criteria, indicators and target level, 3<sup>rd</sup> slide) findings compared with success criteria, and 4<sup>th</sup> slide) interventions of the EC plus limits of the evaluation.

## ANNEX 5 - QUALITY ASSESSMENT GRID

<b>Concerning these criteria, the evaluation report is:</b>	Unacceptable	Poor	Good	Very good	Excellent
<b>1. Meeting needs:</b> Does the evaluation adequately address the information needs of the commissioning body and fit the terms of reference?					
<b>2. Relevant scope:</b> Is the rationale of the policy examined and its set of outputs, results and outcomes/impacts examined fully, including both intended and unexpected policy interactions and consequences?					
<b>3. Defensible design:</b> Is the evaluation design appropriate and adequate to ensure that the full set of findings, along with methodological limitations, is made accessible for answering the main evaluation questions?					
<b>4. Reliable data:</b> To what extent are the primary and secondary data selected adequate. Are they sufficiently reliable for their intended use?					
<b>5. Sound analysis:</b> Is quantitative information appropriately and systematically analysed according to the state of the art so that evaluation questions are answered in a valid way?					
<b>6. Credible findings:</b> Do findings follow logically from, and are they justified by, the data analysis and interpretations based on carefully described assumptions and rationale?					
<b>7. Validity of the conclusions:</b> Does the report provide clear conclusions? Are conclusions based on credible results?					
<b>8. Usefulness of the recommendations:</b> Are recommendations fair, unbiased by personnel or shareholders' views, and sufficiently detailed to be operationally applicable?					
<b>9. Clearly reported:</b> Does the report clearly describe the policy being evaluated, including its context and purpose, together with the procedures and findings of the evaluation, so that information provided can easily be understood?					
<b>Taking into account the contextual constraints on the evaluation, the overall quality rating of the report is considered.</b>					

(for details on how criteria are rated refer to:

[http://ec.europa.eu/comm/europeaid/evaluation/methodology/guidelines/gui\\_qual\\_flr\\_trg\\_en.htm](http://ec.europa.eu/comm/europeaid/evaluation/methodology/guidelines/gui_qual_flr_trg_en.htm))

## Annex 2 – Inventory of PSD interventions over 2004-2010

---

This annex presents the inventory of the Commission's interventions in support of private sector development (PSD)<sup>1</sup> in all third countries except for pre-accession ones over the period 2004-2010. It lists the Commission's financial contributions to PSD both from the General Commission Budget and from the European Development Fund (EDF).

The inventory is made up of two components:

- **direct support to PSD**, through individual interventions, centralised and intra-ACP operations<sup>2</sup> and Sector Budget Support, *and*
- **indirect support to PSD**, through General Budget Supports with references to PSD in their indicators for the release of variable tranches, *and*

The first two components (direct and indirect support to PSD) are presented in the following section. The databases follow.

In addition a database, provided by unit C4 of DG DEVCO, of PSD interventions funded under the Neighbourhood Investment Facility (NIF), under the Latin American Investment Facility (LAIF) as well as a list of Risk Capital interventions and Technical Assistance funded under the FEMIP (EIB-managed) is also included.

---

<sup>1</sup> Excluding interventions aimed at supporting trade mainly or exclusively.

<sup>2</sup> Centralised and intra-ACP operations are the following: the Private Sector Enabling Environment Facility (BizClim), FEMISE research network, the Asia- Europe Business Forum (AEBF), the Centre for the Development of Enterprise (CDE), PROINVEST, the EU/ACP Microfinance Programme, and Commission investment facilities: the facility for Euro-Mediterranean Investment and Partnership (FEMIP), the Neighbourhood Investment Facility (NIF), and the Latin American Investment Facility (LAIF). It should be noted that the EIB-managed Investment facility for ACP countries (ACP EIB IF) has not been included in the inventory as, it has been considered as out of scope by the ToRs of the present evaluation. Whilst it is funded by the EDF, funds have been directly transferred from EU member states and not channeled through the Commission. Over the period 2003-2009, €3.5bn were contracted through the ACP EIB IF under the EDF (source: ADE (for the European Commission), *Mid-term Evaluation of the Investment Facility and EIB own resources operations in ACP countries and the OCTs*, September 2010, p.3). Its complementarity with the Commission's support to PSD will be analysed in the evaluation.

Section 1.1 below presents the:

- **direct support to PSD**, through individual interventions, centralised and intra-ACP operations and Sector Budget Support, *and*
- **indirect support to PSD**, through General Budget Supports with references to PSD in their indicators for the release of variable tranches.

The methodology used by the evaluation team to compile the inventory is explained in two parts under section 1.2:

- Methodology used for the list of the Commission's interventions in *direct* support to PSD, *and*
- Methodology used for the elaboration of the Commission's *indirect* support to PSD, via General Budget Support.

## 1.1 The results of the inventory

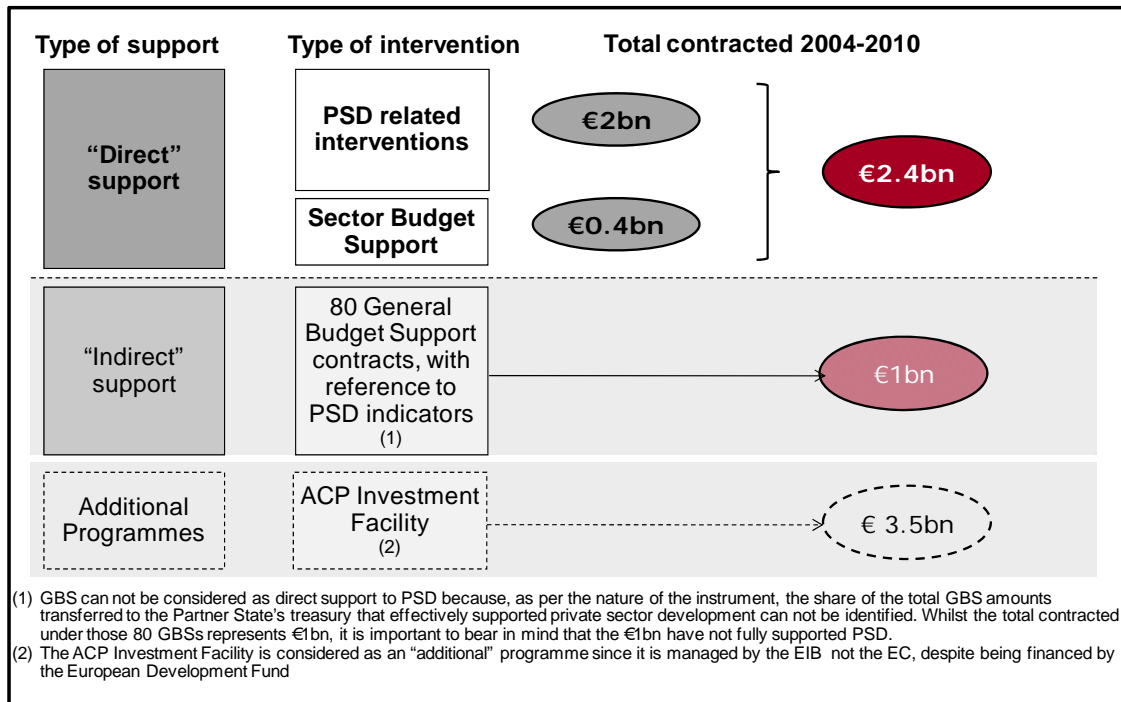

The inventory is made up of contracts contracted between 2004 and 2010 under Decisions adopted between 1996 and 2010. The data presented is based on the extraction from CRIS dated June 2011 (see section 1.2 on the methodology used for the elaboration of the inventory, for further details).

This section describes certain observations, such as, for instance, a sudden change in funding in a particular year. Only a description can be provided at this stage of the evaluation. A more in-depth analysis will be provided, where relevant, in the evaluation itself.

The figure below gives an overview of the inventory. It shows that between 2004 and 2010:

- *direct* support to PSD totaled €2.4bn, of which €2bn contracted under direct interventions and €0.4bn contracted under Sector Budget Support. Within this total figure, €327m worth of interventions had a strong PSD component as well as a Trade component. As these trade-related interventions also had a strong PSD component, they have been included in the PSD inventory; *and*
- €1bn was contracted under General Budget Supports with references to PSD in their indicators for the release of variable tranches. This support has been considered as *indirect* by the evaluation team because as per the nature of the instrument, **the share of the total GBS amounts transferred to the Partner State's treasury that effectively supported private sector development cannot be identified**. It is therefore **important to bear in mind that the €1bn has not fully supported PSD** *and*
- €3.5bn has been contracted via the ACP Investment Facility. Whilst the Facility is funded from the EDF, it is managed by the EIB not the Commission. It is therefore not part of the scope of this evaluation, and has not been included in the inventory of activities. Nevertheless, given that the Facility is geared towards fostering private sector investment in ACP countries, it is worth noting the contribution made by the Commission during the evaluation period.

**Figure 1.1 – Global overview of Commission financial contribution to PSD**

### 1.1.1 The Commission *direct* support to PSD between 2004 and 2010

This section presents:

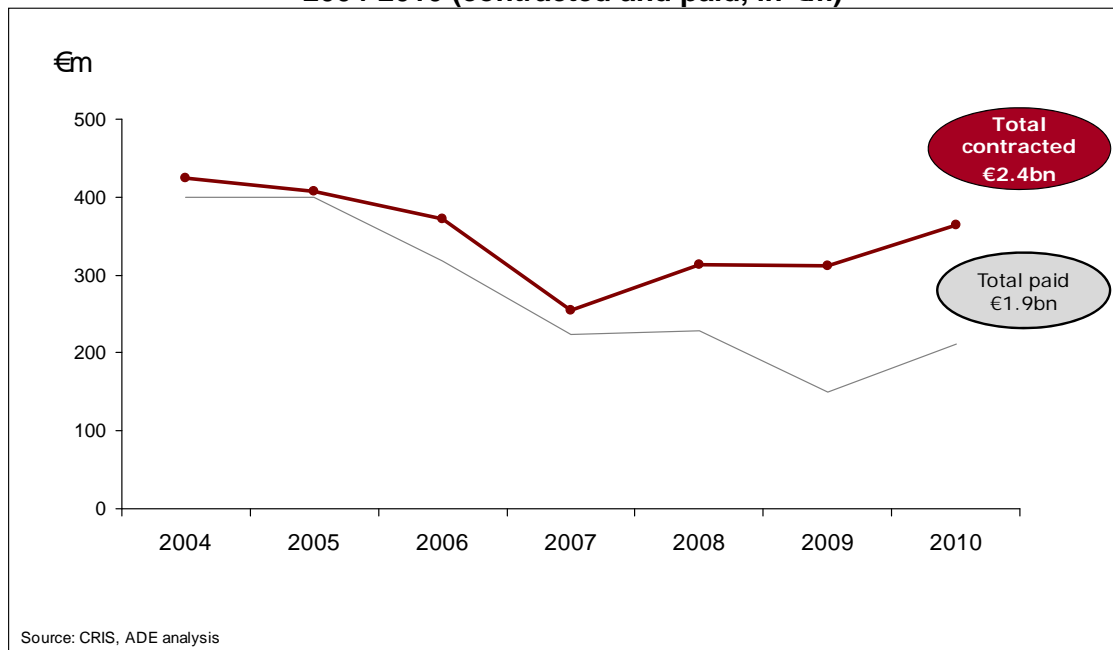

- The **temporal evolution** of the Commission's *direct* support to PSD between 2004 and 2010;
- The **distribution** of the Commission's total *direct* support to PSD by **Commission's areas of intervention**, as identified in COM (2003) 267;
- The **geographical distribution** of the Commission's total *direct* support to PSD and the list of the largest beneficiaries;
- The **distribution** of the Commission's total *direct* support to PSD by **financial instrument**;
- The **distribution** of the Commission's total *direct* support to PSD by **channel of delivery**; *and*
- Interventions supported by **centralized operations**.

#### 1.1.1.1 Evolution of the Commission's *direct* support to PSD between 2004 and 2010

Between 2004 and 2010, the European Commission's *direct* contracted support to PSD worldwide amounted to **€2.4bn**. The total amount paid<sup>3</sup> was of €1.9bn. The disbursement rate was thus of 79%.

The evolution of the Commission's support over this period is presented in the figure below.

**Figure 1.2 – Annual evolution of the Commission's *direct* support to PSD across 2004-2010 (contracted and paid, in €m)**

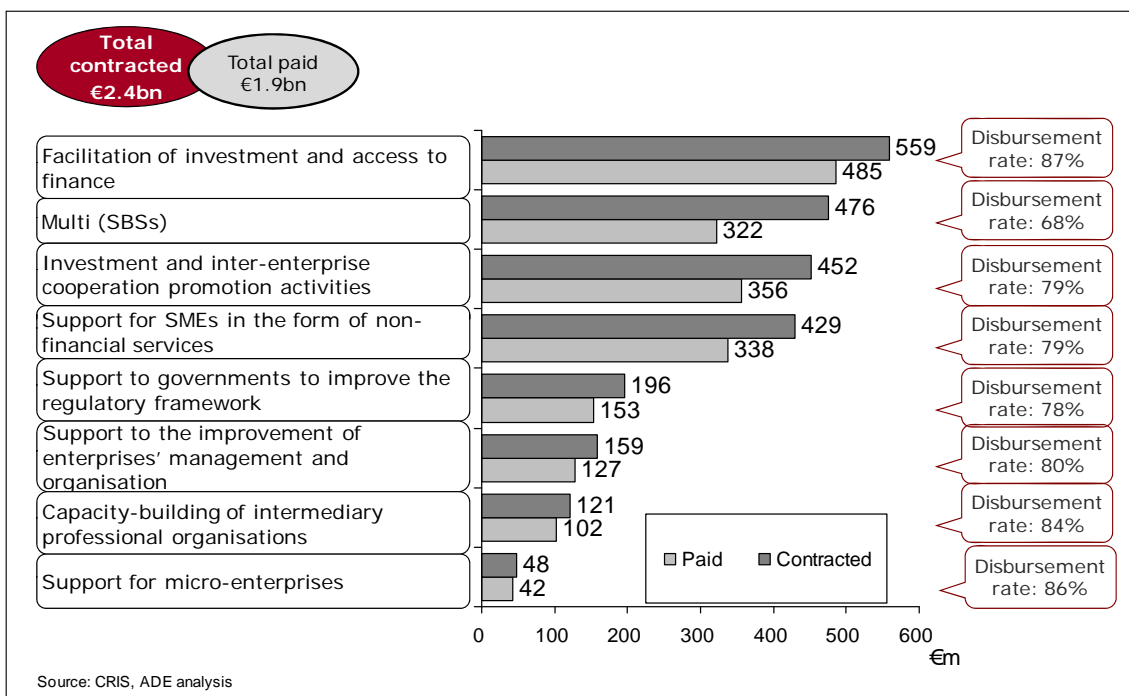

<sup>3</sup> Paid amounts are reported in CRIS as the sum of all payments made from the date of signature of the contract until the date of the data extraction from CRIS. The evaluation team extracted the data from CRIS in June 2011. Therefore, for on-going interventions, it is normal to find a difference between amounts contracted and paid amounts as final payments are usually carried out at the end of the interventions' implementation.

The Commission's *direct* contracted support to PSD has **decreased by €61m<sup>4</sup>** over the period evaluated, starting at €425m in 2004 to end at €364m in 2010. Contracted amounts increased from 2008 on account of the contracting of €50m under AL-INVEST IV in Latin America<sup>5</sup>, of €32m in support to the Facility for Euro-Mediterranean Investment and Partnership<sup>6</sup> (FEMIP) for the Mediterranean region and of €30m for the "Sector Budget Support Implementation Contract for Innovation for Poverty Alleviation" in South Africa.

### 1.1.1.2 Thematic breakdown

Each intervention listed in the inventory has been classified by the evaluation team under one of the areas of the Commission's intervention in PSD identified by the evaluation team on the basis of the COM (2003) 267 and the Commission's Guidelines 2003 for PSD (see Section 4.2 and Table 4.6 – *Typology of the Commission's areas of interventions in PSD and PSD Sector codes and matching DAC codes*). As specified in TPSD (2010), "building productive capacity" is a transversal objective of all areas of interventions listed below. The Sector Budget Supports have been classified under a "Multi" category, as, per definition, they support a sector-wide reform process and cover multiple areas of intervention. The distribution of the Commission's *direct* support to PSD by areas of intervention is represented in the figure below.

**Figure 1.3 – Distribution by area of intervention of total Commission *direct* support to PSD (contracted and disbursed, in €m)**

<sup>4</sup> Only a description can be provided at this stage of the evaluation. A more in-depth analysis of this trend will be provided at a later stage.

<sup>5</sup> The AL-INVEST Programme is a European Commission (EC) initiative to support the internationalisation of Latin American SMEs. [http://ec.europa.eu/europeaid/where/latin-america/regional-cooperation/al-invest/index\\_en.htm](http://ec.europa.eu/europeaid/where/latin-america/regional-cooperation/al-invest/index_en.htm)

<sup>6</sup> <http://www.eib.org/projects/regions/med/about/index.htm?lang=en>, accessed 8 August 2011

The area of intervention which received the most Commission funding over the period evaluated has been **“Facilitation of investment financing and access to financial markets**, for which €559m were contracted. It included all interventions such as:

- Regular support between 2004 and 2010 to the FEMIP<sup>7</sup> within the EIB, which totaled €209m;
- Support to Risk Capital Facilities, including €129m under the EIB's Risk Capital Facility, in 2004, 2005 and 2006;
- Assistance to the modernisation, restructuring or reform of banks, the banking sector or other financial institutions, such as, in 2004, support to the Development of Bank of Ethiopia (€25m).

The **“Multi” category**, under which the **Sector Budget Supports** which have addressed PSD have been classified, has received the second largest amount of support (€476m in total).

Interventions grouped under the **“Investment and inter-enterprise cooperation promotion activities”** area received €452m of total Commission contracted support worldwide. This category covered support to industrial modernization, economic diversification, technological research and development. For instance, in that area, €2.3m were contracted under the « Public Private Partnership - Suriname Business Forum (SBF)”.

**“Support to SMEs in the form of non-financial services”** was the fourth largest area supported, receiving €429m. It covered interventions such as:

- €140m worth of support to the “Centre for the Development of Enterprise”<sup>8</sup>, a joint ACP-EU created in the framework of the Cotonou Agreement which offers a broad range of assistance for the creation and strengthening of ACP enterprises *and*
- Various support programmes, targeting SMEs’ competitiveness, capacity-building (providing technical assistance or equipment and training).

The area **“Support to governments to improve the necessary regulatory framework, institution building related to PSD”** received €196m of support. It covered support to the modernisation or reform of administrations or civil services or bodies involved in PSD, such as “Support to the SME Division of the Ministry of Economy and Trade” in Lebanon (€3m) or support to changes in legal systems such as “Approximation of Competition rules” in Russia, or “Législation commerciale et instruments d’application” in Algeria. €23m were contracted in support to the “Private Sector Enabling Environment Facility” in ACP countries.

Interventions amounting to €159m were categorised under the **“Support to the improvement of enterprises’ management and organisation”** area, which covered support to enterprises in the context of privatisation or industrial development processes, such as the €17m contracted under the “Appui à la restructuration industrielle et à la

<sup>7</sup> <http://www.eib.org/projects/regions/med/about/index.htm?lang=en> , accessed 8 August 2011

privatisation "programme"<sup>9</sup> in Algeria as well as support to organisations providing business support and information services to enterprises, such as the "EU Centre for Support to European SMEs" in China.

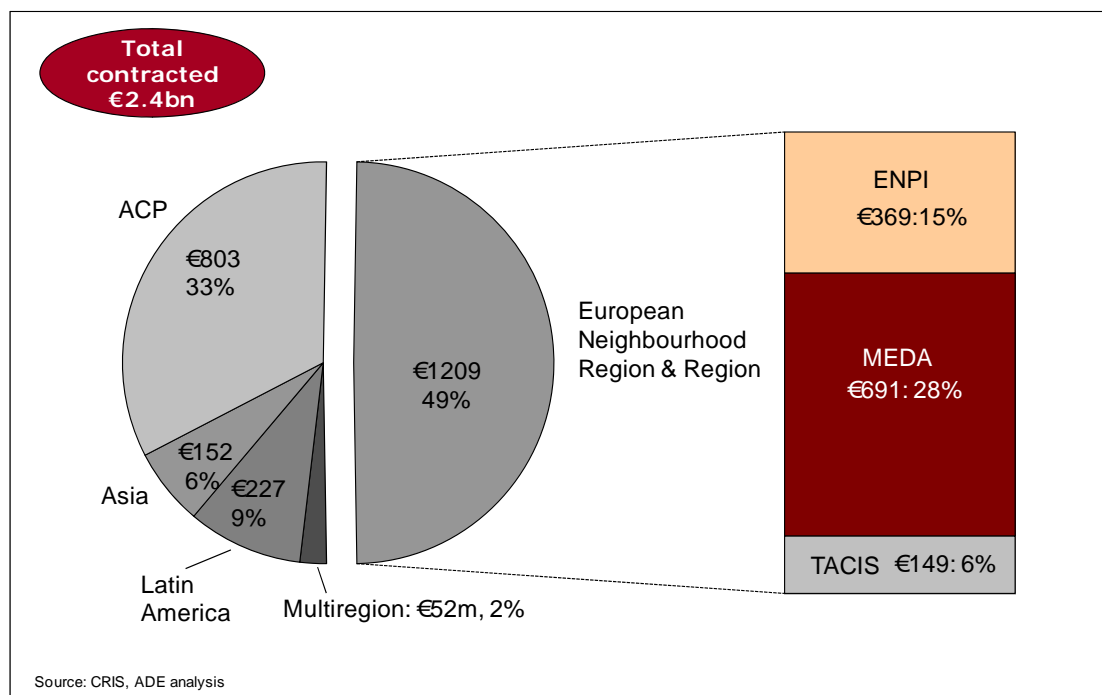

**"Capacity-building of intermediary professional organisations"** accounted for €121m. It was allocated to intermediary organisations such as the "Caribbean Association of Investment promotion agencies" (CAIPA) or the "Dominican Republic Industrial Association". Under a 2000 Decision, €68.4m (i.e. 57% of the total of that Area) were contracted in support of "PROINVEST", an EU-ACP partnership programme<sup>10</sup>.

The smallest area supported (€48m contracted) was **"Support to micro-enterprises"**. €11m were contracted between 2004 and 2007 under the "Microfinance Framework Programme", €1.8m under the "EU-ACP Microfinance Framework Programme" between 2008 and 2010 and €7m in 2010 under the "EU/ACP Microfinance Framework Programme".

### 1.1.1.3 Geographical breakdown

The geographical distribution<sup>11</sup> of total Commission support to PSD between 2004 and 2010 is presented in the figure below.

**Figure 1.4 – Geographical distribution of total *direct* Commission support to PSD (contracted, in €m) between 2004-2010**

<sup>9</sup> Under which the following contracts, for example, were contracted: "Assistance à la privatisation des grandes entreprises" and "Préparation à la privatisation de 6 entreprises de taille moyenne des secteurs des industries agroalimentaires et chimiques ».

<sup>10</sup> <http://www.proinvest-eu.org/about-programme>, accessed 8 August 2011.

<sup>11</sup> Based on the encoding in CRIS, the Commission database.

The figure shows that:

- **half of the Commission's support to PSD worldwide was contracted in the zone "European Neighbourhood and Russia"**, of which 28% (€691m) via MEDA, 15% (€369m) via ENPI and 6% (€149m) via TACIS;
- The **ACP** region received a **third** of total Commission support to PSD (€803m).
- **Latin America** accounted for 9% of the total support, (€227m); *and*
- €152m were contracted in **Asia**, representing 6% of total Commission support to PSD worldwide; *and*
- The "**Multi-region**" zone (i.e. interventions which neither benefited a single country or single region, including interventions classified as "all countries" in CRIS) represented 2% of total contracted support worldwide (€52m).

A more precise geographical distribution can be extracted from the inventory. The table below represents the **20 largest beneficiaries** (countries, regional or multi-region zones<sup>12</sup>), out of a total of 102 which received direct Commission support (in contracted amounts) in the field of PSD between 2004 and 2010.

Out of the **102 beneficiaries, 83 are countries and 19 are regions** or other larger geographical zones. The full list of beneficiaries is presented in Annex 4.

**Support to PSD has focused on a number of key countries or regions** as support to the 20 largest beneficiary zones represents **78%** of the total support contracted worldwide.

---

<sup>12</sup> As encoded in CRIS. Countries are reported in the "beneficiary zone" column in CRIS when the intervention is country-specific and regions or multi-region zones are reported for regional interventions.

**Table 1.1 – 20 largest beneficiaries of total *direct* Commission support to PSD (contracted, in €m)**

Country/Region	Amount contracted		Amount disbursed	
	EUR	% of total	EUR	Disbursement %

The **geographical breakdown by area of intervention** shows the areas most and least supported in the main beneficiary regions<sup>13</sup>.

<sup>13</sup> Contracts for which no beneficiary zone has been encoded have not been represented in the figure.

**Table 1.2 – Geographical breakdown of the Commission's *direct* support to PSD by area of intervention 2004-2010  
(contracted, €m)**

Area of intervention as classified in the inventory	ENP - MEDA	% out of total in region	ACP	% out of total in region	ENP - TACIS	% out of total in region	LATIN AMERICA	% out of total in region	ASIA	% out of total in region	MULTI REGION	% out of total in region	Total	% of area out of total
Facilitation of investment financing and access to financial markets, in general	396	41%	35	5%	110	41%	2	1%	15	10%	1	2%	560	23%
Multi (SBS)	155	16%	230	30%	0	0%	91	41%	0	0%	0	0%	476	19%
Investment and inter-enterprise co-operation promotion activities	156	16%	125	16%	74	28%	22	10%	52	35%	22	27%	452	18%
Support for Small and Medium- sized Enterprises (SMEs) in the form of non-financial Services	81	8%	180	24%	11	4%	94	43%	48	32%	14	17%	429	18%
Support to governments to improve the necessary regulatory framework	46	5%	76	10%	59	22%	0	0%	16	10%	0	0%	196	8%
Support to the improvement of enterprises' management and organisation	116	12%	14	2%	5	2%	7	3%	11	8%	5	7%	159	7%
Capacity building of intermediary professional organisations	6	1%	68	9%	4	1%	0	0%	4	3%	38	47%	121	5%
Support for micro-enterprises	3	0%	35	5%	4	2%	3	1%	3	2%	0	0%	49	2%
<b>Total</b>	<b>959</b>	<b>100%</b>	<b>762</b>	<b>100%</b>	<b>268</b>	<b>100%</b>	<b>221</b>	<b>100%</b>	<b>150</b>	<b>100%</b>	<b>82</b>	<b>100%</b>	<b>2442</b>	<b>100%</b>

The table shows that in the following regions, the **areas that received the *most* support** were:

- **“Facilitation of access to finance”** in the **European neighbourhood** notably in MEDA (41% of total contracted in the region) and TACIS (41% contracted in the region) *and*
- The **“Multi” category** (under which all the **Sector Budget Supports in PSD** have been categorized) notably in Latin America (41% of total contracted in the region), ACP (30% in the region) and MEDA (16% in the region) *and*
- **“Investment and inter-enterprise co-operation promotion activities”** notably in **Asia** (35% of total worldwide), in **TACIS** (28% of total contracted in the region) and in the Multi-region zone (27% of total contracted in the zone).

In the following regions, the **areas that received the *least* support** were:

- “Support to micro-enterprises” in the European neighbourhood (MEDA and TACIS), Latin America, Asia, and in the Multi-region zone, *and*
- “Support to the improvement of enterprises’ management and organisation” and “Support to micro-enterprises” in ACP.

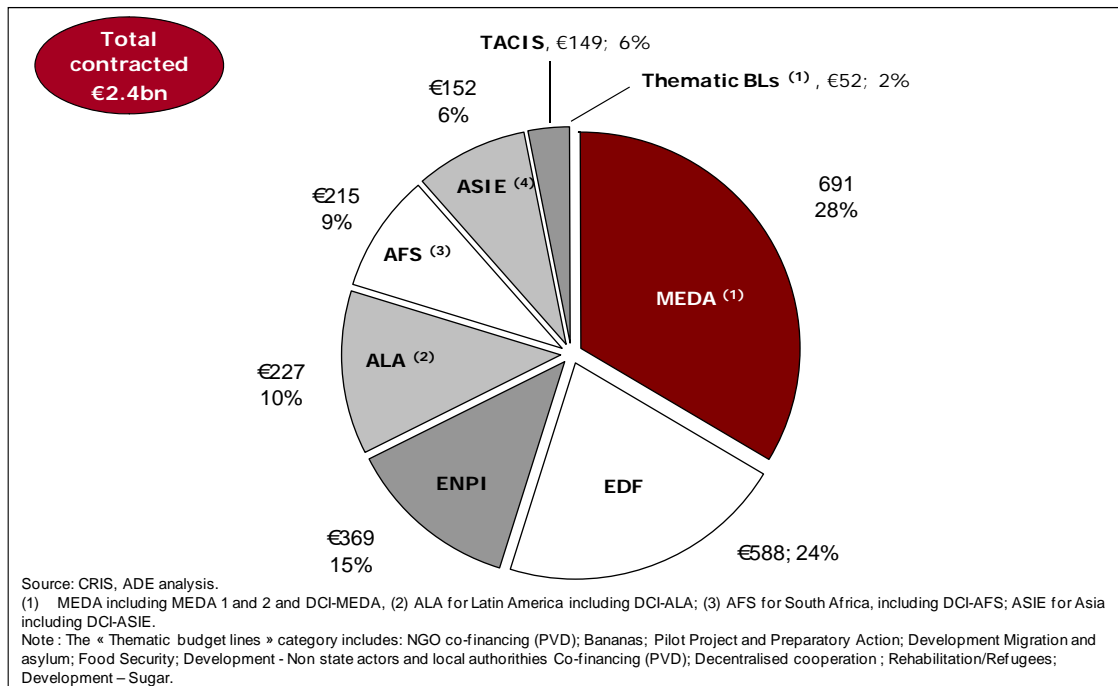

More specifically:

- In the **MEDA region**, 41% of contracted funds to the region supported the “Facilitation of investment financing and access to financial markets”, 16% supported “Investment and inter-enterprise co-operation promotion activities”, 12% supported “the improvement of enterprises’ management and organization” and 8% supported “Small and Medium- sized Enterprises (SMEs) in the form of non-financial Services”;
- In the **ACP region**, 24% of contracted funds supported “Small and Medium-sized Enterprises (SMEs) in the form of non-financial Services” and 16% supported “Investment and inter-enterprise co-operation promotion activities”;
- In the **TACIS region**, 41% of support to PSD was targeted at “Facilitation of investment financing and access to financial markets, in general”, 28% at “Investment and inter-enterprise co-operation promotion activities” and 22% at “Support to governments to improve the necessary regulatory framework, institution building related to PSD” *and*
- In **Latin America**, 43% of aid to PSD supported “Small and Medium-sized Enterprises (SMEs) in the form of non-financial Services” *and*
- In **Asia**, the area of intervention “Support for Small and Medium-sized Enterprises (SMEs) in the form of non-financial Services” received 32% of PSD support *and*
- In the “multi-region” zone, 47% of contracted funds supported the area “Capacity building of intermediary professional organizations”.

#### 1.1.1.4 Budget line/financial instrument breakdown

The distribution of the Commission’s direct support by budget line/financial instrument or geographical programme is presented in the figure below.

**Figure 1.5 – Distribution by budget line/financial instrument of total *direct* Commission support to PSD (contracted, in €m)**

**Support to PSD has been supported almost exclusively by geographical programmes** and so the distribution by financial instruments reflects the geographical distribution.

- MEDA 1 and 2 (incl. DCI-MEDA) for Mediterranean countries funded the largest share of the Commission's support to PSD, i.e. close to a third of total support (€691m);
- The European Development Fund (EDF) came second, having supported a quarter of total support worldwide (€588m);
- The European Neighbourhood Policy Instrument (ENPI) supported 15% of the total (€369m). It should be noted that the budget line ENPI was created for the 2007-2013 programming as a replacement of the TACIS (for Eastern neighbours) and MEDA (for Mediterranean neighbours) budget lines. Therefore, the category ENPI in the figure above includes interventions in the Mediterranean and in Eastern Europe and Central Asia as from 2007 only;
- 9% were contracted under ALA, (incl. DCI-ALA) for Latin American countries (€227m);
- 9% were contracted under AFS (incl. DCI-AFS) for South Africa (€215m);
- 6% were contracted under ASIE (incl. DCI-ASIE) (€152m) and
- 6% were contracted under TACIS for Eastern European countries and Central Asia (€149m).

**2% of total support was contracted under thematic budget lines (€52m).** They included NGO co-financing (PVD); Bananas; Pilot Project and Preparatory Action; Development Migration and asylum; Food Security; Development - Non state actors and local authorities Co-financing (PVD); Decentralised cooperation; Rehabilitation/Refugees; Development – Sugar.

### 1.1.1.5 Channel of delivery breakdown

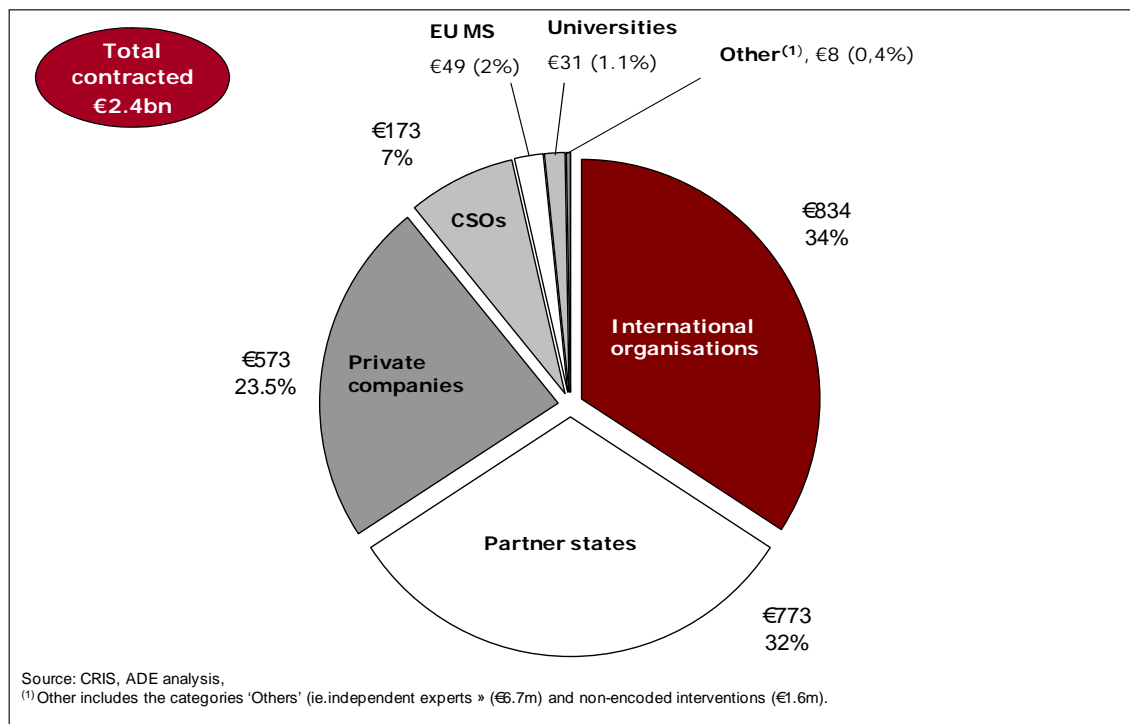

In most cases the name of the intervention's "contracting party" is reported in CRIS<sup>14</sup>. In its support to PSD, the Commission used **808 different contracting parties** for the implementation of its support.

For reasons of clarity, the evaluation team has classified these different actors on the basis of the information provided in the name of the contracting parties. In total **seven categories**, or channels of delivery, were identified:

- International organizations;
- Private companies;
- Civil Society Organisations (NGOs, and civil society group, professional association, chambers of commerce and industry);
- Partner states and their administrations;
- Research institutes and universities (e.g. the Dansk Centre for Internationale studier);
- EU member states their local governments, administrations, and Development agencies (e.g. Deutsche Gesellschaft fur Technische Zusammenarbeit (GTZ));
- Other (e.g. individual experts).

The following figure presents the breakdown of interventions by channel of delivery used by the Commission to implement its support to PSD.

**Figure 1.6 – Distribution by channel of delivery (contracted amount in €m and %)**

<sup>14</sup> For some interventions, CRIS does not provide any information on the contracting party. These interventions have been classified by the evaluation team under the "Other" category.

The figure shows that:

- **A third** of the Commission's *direct* support to PSD has been **delivered through international organizations**, out of which **51% through the European Investment Bank** (€432m) and **22% through the "Centre for the Development of Enterprise" (CDE)** (€183m)<sup>15</sup> *and*
- 32% were channelled through **partner states** (€773) of which 60.5% through SBS. The other interventions included, for example, support to the formulation of Business Climate Development Strategies and supporting services such as market or institutional assessments, mapping of quality infrastructure, etc.; *and*
- **23.5%** of funds (€573m) were channelled through **Private companies**.

The other channels of delivery used were:

- **CSOs** (€173m);
- **EU member states and their development agencies** (€49m);
- **Universities and Research institutes** (€31m); *and*
- **Other** (e.g individual experts) (€6.7m).

The contracting parties of interventions for which a total of €1.6m were contracted have not been encoded in CRIS, therefore the channel of delivery could not be identified.

#### ***1.1.1.6 Interventions supported by centralised and intra-ACP operations***

Centralised and intra-ACP operations are the following: the Private Sector Enabling Environment Facility (BizClim), FEMISE research network, the Asia- Europe Business Forum (AEBF), the Centre for the Development of Enterprise (CDE), PROINVEST, the EU/ACP Microfinance Programme, and Commission investment facilities<sup>16</sup>: the Facility for Euro-Mediterranean Investment and Partnership (FEMIP), the Neighbourhood Investment Facility (NIF), and the Latin American Investment Facility (LAIF).

This section has been elaborated on the basis of the information included in the inventory of the Commission's direct support to PSD as well as on the basis of edited overviews provided by the Commission services (NIF, LAIF and FEMIP) or existing evaluation reports (CDE and EU-ACP Microfinance Programme).

The table below presents the information gathered from the three types of sources outlined above. The first column presents the figures included in the inventory, as reported in the

<sup>15</sup> Joint ACP-EU created in the framework of the Cotonou Agreement, [http://www.cde.int/view\\_content.aspx?id=19&niveau=1](http://www.cde.int/view_content.aspx?id=19&niveau=1), accessed 8 August 2011.

<sup>16</sup> It should be noted that the EIB-managed Investment facility for ACP countries (ACP EIB IF) has not been included in the inventory as, it has been considered as out of scope by the ToRs of the present evaluation. Whilst it is funded by the EDF, funds have been directly transferred from EU member states and not channeled through the Commission. Over the period 2003-2009, €3.5bn were contracted through the ACP EIB IF under the EDF (source: ADE (for the European Commission), *Mid-term Evaluation of the Investment Facility and EIB own resources operations in ACP countries and the OCTs*, September 2010, p.3). Its complementarity with the Commission's support to PSD will be analysed in the evaluation.

Commission's overall CRIS database, corresponding to total *envelopes* contracted per centralised and intra-ACP operations over the period 2004-2010. The second column presents figures originating from data sources specific to each centralised or intra-ACP operation, corresponding to their budget or amounts used specifically for interventions..

**Table 1.3 – Support to centralised and intra-ACP operations<sup>17</sup>**

Centralised operations and Investment facilities	Total envelopes contracted per centralised operation (2004-2010), as reported in the inventory, based on CRIS	Total budget and/or amounts used specifically for interventions, as reported in data sources specific to each centralised operation
<b>Centralised operations</b>		
CDE	€140m	Budget 2005-2009: €108m (1) €23.2 for interventions 2005-2009 (2)
Proinvest	€75m	
Private Sector Enabling Environment Facility (BizClim)	€24m	
EU-ACP Microfinance Programme and Framework Programmes	€20m	Budget 2005-2010: €15m (3) €12.4m for interventions 2005-2009 (4)
FEMISE research network	No interventions found in CRIS within the temporal scope	Budget 2005-2009: €4.9m (5)
<b>Investment facilities</b>		
FEMIP	€234m	€286.2m for interventions 2004-2010 (6)
NIF	€47m	€42m for interventions 2008-2010 (7)
LAIF	€3m	€3m for one intervention in 2010 (8)
<b>All other interventions</b>	€1 899m	
<b>TOTAL</b>	<b>€2 442m</b>	

<sup>17</sup> The database detailing interventions funded under the Asia- Europe Business Forum (AEBF) is pending.

- (1) For the period 2005-2009, **available budget**; as determined in ADE (for the European Commission), *Draft final report of the Evaluation of the Centre for the Development of Enterprise*, August 2011; see Annex 3.1.
- (2) For the period 2005-2009, for operations, in **disbursed amounts**; as determined in ADE (for the European Commission), *Draft final report of the Evaluation of the Centre for the Development of Enterprise*, August 2011; see Annex 3.1.
- (3) For the period 2005-2010, **budget**, as determined in ADE (for the European Commission), *Inception report of the Final Evaluation of the EU/ACP Microfinance Programme*, May 2011, see Annex 3.2.
- (4) For the period 2005-2009, **payments**; as determined in ADE (for the European Commission), *Inception report of the Final Evaluation of the EU/ACP Microfinance Programme*, May 2011; see Annex 3.2.
- (5) "Budget €4.9 million (2005-2009 MEDA) and €4 million (end 2009-end 2012 ENPI). FEMISE timeframe: 2005-2010", as reported in EuropeAid, "Our Neighbours: Panorama of Regional Programmes and Projects in the Mediterranean Countries", 2010, p.21, ec.europa.eu/europeaid/.../neighbourhood/.../infornotes\_south\_2010\_en.pdf
- (6) As reported in Commission database of PSD technical assistance interventions funded under the Facility for Euro-Mediterranean Investment and Partnership (FEMIP), provided by DG DEVCO.
- (7) Total NIF grants in 2008-2010 as reported in Commission database of PSD interventions funded under the Neighbourhood Investment Facility (NIF), provided by DG DEVCO.
- (8) LAIF grant in 2010, as reported in Commission database of PSD interventions funded under the Latin American Investment Facility (LAIF), provided by DG DEVCO.

To provide a more precise view of the EU's support through centralised and intra-ACP operations, details of operations funded by the NIF, LAIF and FEMIP are provided in Annex 2, and by the CDE and the EU-ACP microfinance programme in Annex 3<sup>18</sup>. In brief, the investment facilities funded the following types of operations:

- The Neighbourhood Investment Facility (NIF) which was launched in 2008 to support SMEs in the neighbourhood region through risk capital operations, provided €10m for risk capital interventions, €17m for technical assistances and €15 for a combined risk capital and technical assistance intervention;
- The Latin American Investment Facility (LAIF) which was launched in May 2009 provided €3m for a technical assistance intervention in the field of energy efficiency and renewable energy for SMEs in Central America; *and*
- The Facility for Euro-Mediterranean Investment and Partnership (FEMIP), which is managed by the EIB, funded €251.6m worth of risk capital interventions (30 in total) and €14.8m worth of technical assistances (21 in total) in the Mediterranean region.

### 1.1.2 The Commission's *indirect* support to PSD between 2004 and 2010

The Commission's indirect support to PSD refers to the General Budget Supports with references to PSD in the indicators for the release of variable tranches. This support has been considered as *indirect* by the evaluation team because, as per the nature of the instrument, **the share of the total GBS amounts transferred to the Partner State's treasury that effectively supported private sector development cannot be identified.**

**80 relevant budget support contracts** with partner governments over the total period were identified. They were contracted under 19 different Decisions.

Relevant GBS contracts were identified on the basis of the existence of references to private sector development in their performance indicators. This was done on the basis of a list of relevant GBSs<sup>19</sup> provided by unit C4 of DG DEVCO which reported the number of TPSD<sup>20</sup> indicators out of the total number of indicators, as well as the overall weight of TPSD components within the GBS. This information is presented in the table 4.4 below. The table shows for instance that:

- certain GBSs are fully relevant to PSD as the indicators for the release of variable tranches are fully related to PSD. This is the case for the "Programme d'appui à l'intégration économique" in Tunisia; "Programme d'appui aux Investissements et aux Exportations" in Morocco; "Poverty Reduction through Private Sector Development employment and growth" in Grenada; "Programme d'Appui Budgétaire d'Urgence (2004-2005)" in Cape Verde";

<sup>18</sup> Extracted from ADE (for the European Commission), *Draft final report of the Evaluation of the Centre for the Development of Enterprise*, August 2011 *and* ADE (for the European Commission), *Inception report of the Final Evaluation of the EU/ACP Microfinance Programme*, May 2011. It must be noted that both of these overviews are extracted from ongoing evaluations and are subject to revisions for their final versions.

<sup>19</sup> At Decision level.

<sup>20</sup> Trade and Private Sector Development.

- other GBSs have a smaller share of TPSD indicators out of the total number of indicators; for instance the “Debt reduction and growth enhancement programme (DRGEP)” in Jamaica has 11% of indicators which are TPSD related;
- the weight of TPSD indicators for the release of the GBS’ variable tranches (in the last column of the table). For instance, it was foreseen that meeting the TPSD indicators under “Poverty reduction budget support programme (PRBS III)” in Mozambique would lead to the release of 15% of the GBS’ variable tranches. It is interesting to note that the TPSD indicators represent 45% of the total number of this GBS’ indicators.

The information, presented in this table, on the importance of PSD within the GBSs identified is important as the amounts under GBSs which effectively supported PSD cannot be identified. For this reason, the full amounts contracted under the GBSs have been reported in this section. It is important however to bear in mind when looking at the figures in this section that the amounts reported have not *exclusively* supported PSD.

**Table 1.4 – The importance of PSD within the GBSs with references to PSD (at Decision level)<sup>21</sup>**

Country	CRIS Decision code	Decision title	Amount contracted (in €m)	N° of TPSD indicators out of total as reported by DEVCO	Share of TPSD indicators out of total indicators as reported by DEVCO	Overall weight of TPSD indicators for the release of variable tranches, as reported by DEVCO

The section below presents:

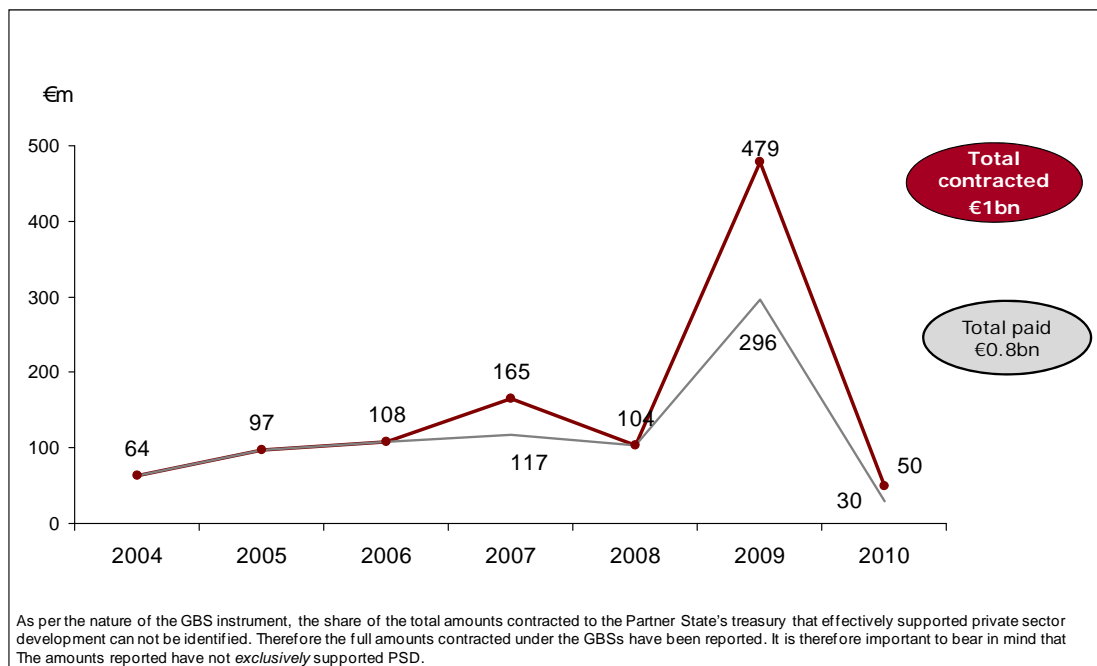

- The temporal evolution of the Commission's indirect support to PSD between 2004 and 2010; *and*
- The geographical distribution of the Commission's total indirect support to PSD and the list of the GBS and SBS beneficiaries.

#### 4.1.2.1 Evolution of transferred amounts

The figure below presents the annual amounts transferred through GBSs with references to PSD. However, as per the nature of the GBS instrument, the share of the total amounts contracted to the Partner State's treasury that effectively supported private sector development cannot be identified. Therefore the full amounts contracted under the GBSs have been reported. It is therefore important to bear in mind that the amounts reported have not *exclusively* supported PSD.

In total, **€1bn** have been contracted through GBSs with a reference to PSD between 2004 and 2010, of which **€814m** have been paid.

**Figure 1.7 – Commission *indirect* assistance to PSD - Annual amounts transferred through GBSs with reference to PSD (contracted and paid, in €m)**

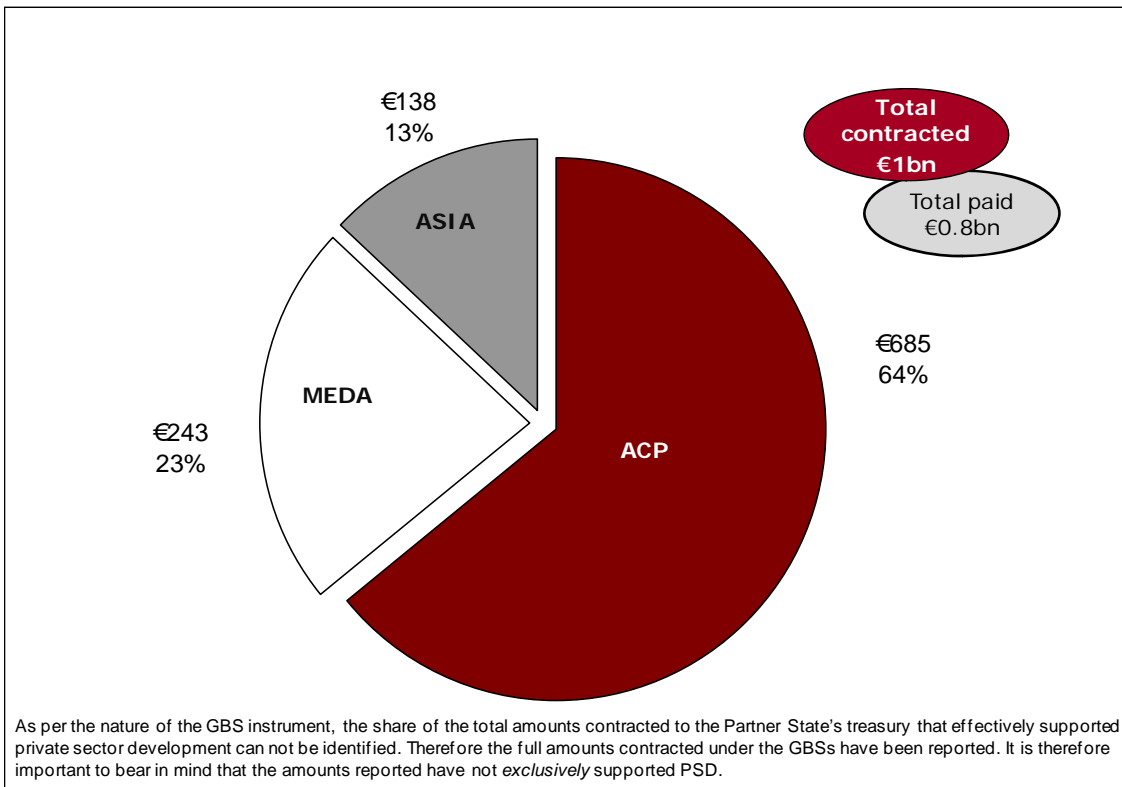

Overall **amounts contracted through GBSs** in support to PSD **decreased** over the period evaluated, starting at €64m in 2004 to €50m in 2010.

An important peak occurred in 2009 on account of the contracting of several large GBSs that particular year: €256.5m in total to Zambia, €43.5m to Vietnam under the “Support to Vietnam's Poverty Reduction and Growth Strategy” under the Poverty Reduction Support Credit (PRSC) 5, 7 and 9 €49.8m to Tunisia for the “Programme d'appui à l'intégration économique” and the “Programme d'appui à la compétitivité (PAC I)”.

1.1.2.2 Geographical distribution

The figure below presents the regional distribution of amounts contracted through GBSs with references to PSD. However, as above and per the nature of the GBS instrument, the share of the total amounts contracted to the Partner State's treasury that effectively supported private sector development cannot be identified. Therefore the full amounts contracted under the GBSs have been reported. It is therefore important to bear in mind that the amounts reported have not *exclusively* supported PSD.

**Figure 1.8 – Regional distribution of amounts contracted through GBSs with reference to PSD (contracted, €m)**

Over the period evaluated, **64% of GBS amounts were contracted in the ACP region** (€685m). **23%** were contracted in **MEDA** (€243m) and 13% in **Asia** (€138m).

The table below represents the **complete list of beneficiaries of GBSs** with a reference to PSD between 2004 and 2010.

**Table 1.5 – Beneficiaries of GBSs with references to PSD (in €m<sup>22</sup>)**

Country	Contracted amount		Paid amount		Disbursement rate
	€m	% of total	€m	% of total	
ZAMBIA	308	29%	178	22%	58%
TUNISIA	188	18%	130	16%	69%
MOZAMBIQUE	134	12%	134	16%	100%
VIETNAM	100	9%	99	12%	99%
TANZANIA	94	9%	94	12%	100%
JAMAICA	65	6%	51	6%	79%
ETHIOPIA	58	5%	58	7%	100%
MOROCCO	55	5%	29	4%	53%
CAMBODIA	23	2%	5	1%	23%
GRENADA	21	2%	19	2%	90%
LAOS	16	2%	11	1%	66%
CAPE VERDE	5	1%	6	1%	120%
<b>Total GBS</b>	<b>1 067</b>	<b>100%</b>	<b>814</b>	<b>100%</b>	<b>76%</b>

Over the period evaluated, a total of **12 countries** received PSD support from **GBSs** with references to PSD.

Budget support was **concentrated geographically**: 59% of amounts contracted under GBSs with reference to PSD went to the following three countries: Zambia, Tunisia and Mozambique.

The **disbursement rate** varied between 23% for Cambodia and 100% for Mozambique, Tanzania, Cap Verde and Ethiopia.

## 1.2 The methodology used for the elaboration of the inventory

The methodology used by the evaluation team to compile the inventory is presented in two parts:

- Methodology used for the list of the Commission's interventions in *direct* support to PSD, *and*
- Methodology used for the elaboration of the Commission's *indirect* support to PSD, via budget supports.

<sup>22</sup> As per the nature of the GBS instrument, the share of the total amounts contracted to the Partner State's treasury that effectively supported private sector development cannot be identified. Therefore the full amounts contracted under the GBSs have been reported. It is therefore important to bear in mind that the amounts reported have not *exclusively* supported PSD.

### 1.2.1 The methodology to identify the Commission's *direct* support to PSD: list of PSD-related contracts

It was agreed with the evaluation's reference group that the four data sources used to draw up the list of PSD-related contracts would be:

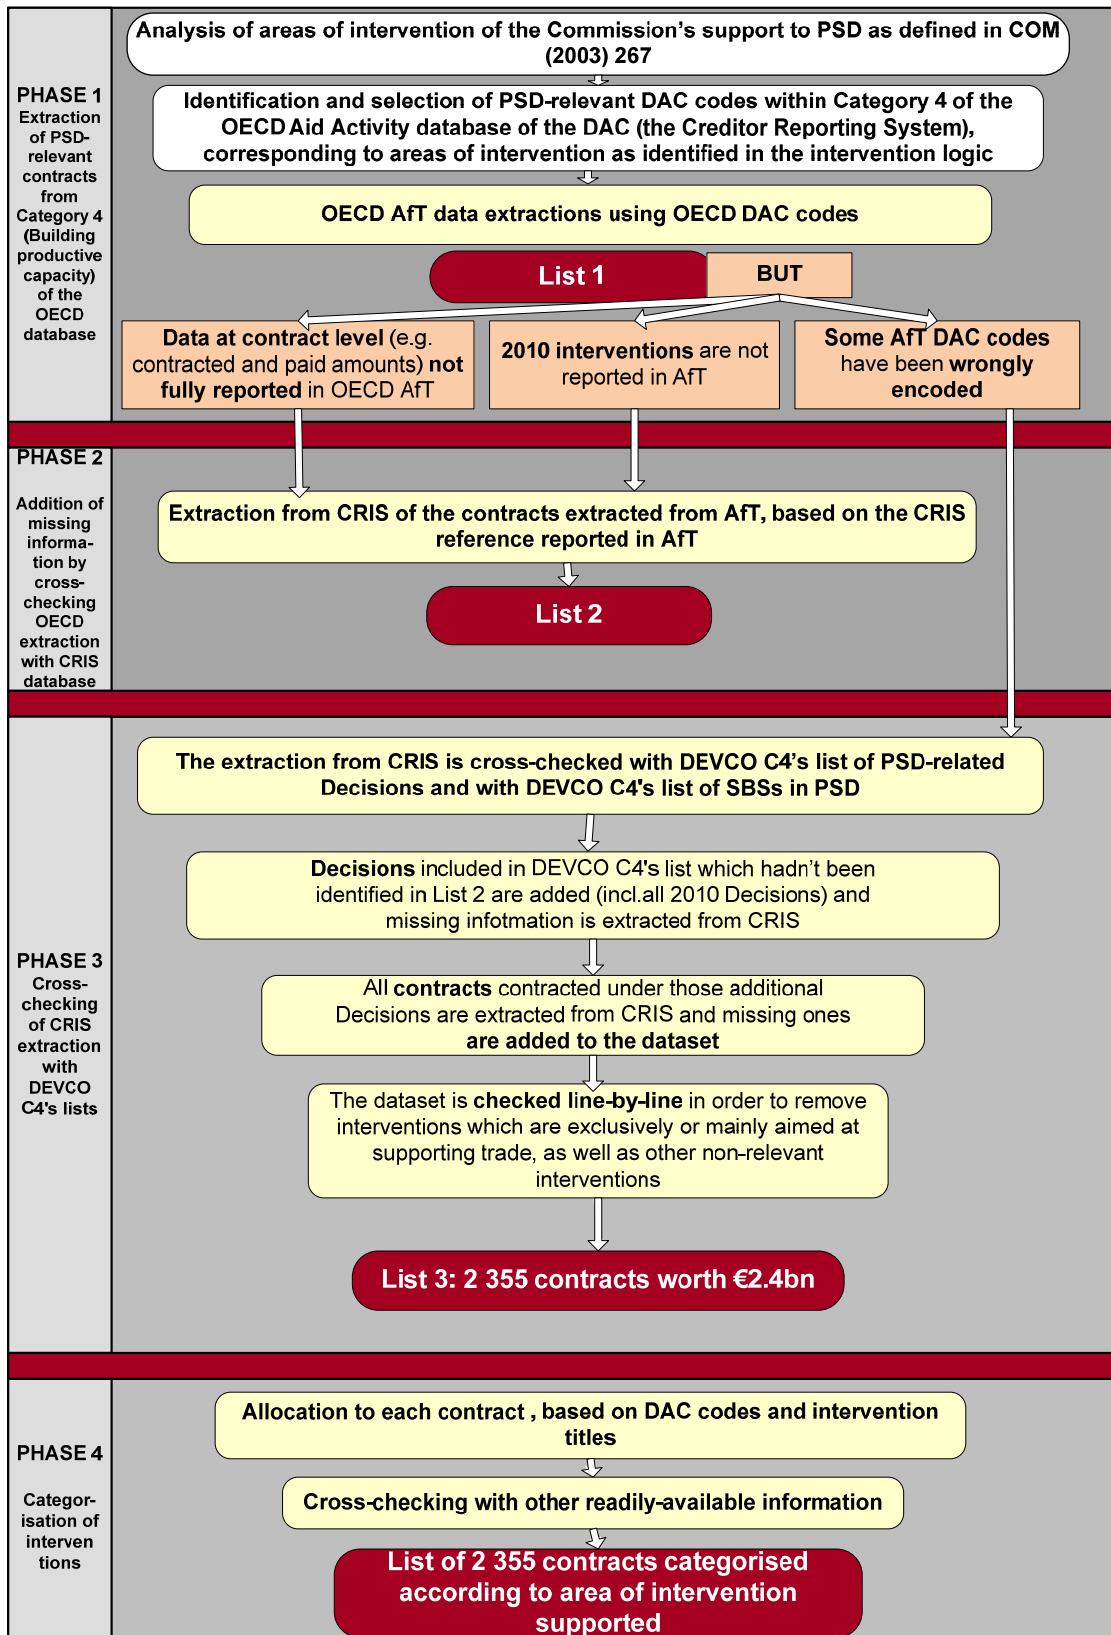

- The OECD Aid Activity database of the DAC (the Creditor Reporting System). It includes the Commission's PSD activities (amongst other activities) over the period 2004-2009 under its Category 4 "Building productive capacity". Importantly, DAC codes are available *for all contracts* reported in the database. Therefore only Category 4 of the OECD Aid Activity database of the DAC (the Creditor Reporting System) was chosen as the initial data source. This allowed the evaluation team to extract all relevant, PSD-related contracts, identified on the basis of their DAC code. However the Aid Activity database of the DAC (the Creditor Reporting System). has shortcomings: information at contract-level (e.g. contracted and paid amounts, contracting parties) required to constitute the inventory is not fully reported in the database and the year 2010 was not covered;
- A Monitoring table listing the PSD-related projects over the evaluation period provided by unit C4 of DG DEVCO. Unlike the OECD Aid Activity database of the DAC (the Creditor Reporting System), it includes interventions in 2010 but the information provided was at Decision level and not at contract level (limiting the information available for the inventory);
- A list of the Commission's sector budget support interventions provided by DEVCO C4 to the evaluation team. DEVCO C4's list of SBSs is at Decision level however and does not include interventions at contract level. Some of the required information (e.g. contracted amounts, paid amounts, contracting parties for example) was also missing; *and*
- The Commission's Common RELEX Information System (CRIS). The CRIS database includes all the required operational data (decisions, projects, contract) and financial data (budget lines, commitments, payments) on the Commission's external assistance<sup>23</sup>. Since 15 February 2009, CRIS also provides data on the European Development Funds<sup>24</sup> in addition to data on interventions financed by the General Commission budget. DAC codes are however not systematically encoded.

**To identify interventions related to PSD and to address ad-hoc issues as they arose, the evaluation team followed the step-by step approach** outlined in the figure below

<sup>23</sup> Managed by the EuropeAid Cooperation Office (AIDCO) and DGs for External Relations of the European Commission (RELEX), for Development (DEV) and for Enlargement (ELARG)

<sup>24</sup> Previously in the On Line Accounting System (OLAS) database.

Figure 1.9 – Approach used to identify the Commission's *direct* support to PSD

## Phase 1: Extraction from the OECD Aid Activity database of the DAC (the Creditor Reporting System) of PSD-related contracts

**Step 1:** The evaluation team **identified and selected 14 DAC codes** corresponding to each of the areas of intervention of the Commission's support to PSD, as defined in COM (2003) 267, in the the Commission's Guidelines 2003 for PSD and reported in the evaluation's intervention logic. The DAC codes were chosen from the DAC codes belonging to Category 4 "Building productive capacity" of the OECD Aid Activity database of the DAC (the Creditor Reporting System), except for the generic codes 15110 for "Public sector policy and administrative management" and 51010 for "General Budget Support". The table below presents this matching exercise.

**Table 1.6 – Typology of the Commission's areas of interventions in PSD and PSD Sector codes and matching DAC codes.**

Sector codes	Areas of interventions for EC supports to PSD (1)	DAC code	Description of activities (2)
1	Support to governments to improve the necessary regulatory framework, institution building related to PSD.	15110	Public sector policy and administrative management
		51010	General budget support
		32110	Industrial policy and administrative management
2	Capacity building of intermediary professional organisations	25010	Business support services and institutions
3	Investment and inter-enterprise co-operation promotion activities.	32182	Technological research and development
		32120	Industrial Development
4	Support to the improvement of enterprises' management and organisation	25020	Privatization
		25010	Business support services and institutions
		24010	Financial policy and administrative management
5	Facilitation of investment financing and access to financial markets, in general.	24020	Monetary institutions
		24030	Formal sector financial intermediaries
		24081	Education/training in banking and financial services
		32130	Small and medium-sized enterprises (SME) development
6	Support for Small and Medium-sized Enterprises (SMEs) in the form of non-financial Services.	32130	Small and medium-sized enterprises (SME) development
7	Support for micro-enterprises.	24040	Informal/semi-formal financial intermediaries

**Caveat:** Larger sector or multi-sector interventions (e.g. in the health, agriculture, forestry, mining, urban development sectors) with PSD components, which have been classified under non-PSD-related DAC codes, are thus not included in the inventory. Indeed, their primary aim is not PSD as such, but the development of a specific sector, which may also encompass activities that relate to the development of the private sector for that sector. They do not aim at PSD as such. The approach followed ensures, to the extent possible, that all interventions listed in the inventory are solely and entirely PSD related.

**Step 2:** The evaluation team extracted all PSD-related contracts in the the OECD Aid Activity database of the DAC (the Creditor Reporting System), based on the DAC codes selected in Step 1.

**The resulting extraction (List 1) had the following shortcomings:**

- **Data at contract level** (e.g. contracted and paid amounts) **was not fully reported** in OECD database,
- **2010 interventions** were not reported in the OECD database provided to the evaluation team, which spanned from 2003 to 2009 *and*
- **Some DAC codes had been wrongly encoded** in the OECD database which could lead to omissions of relevant activities, inclusion of non-relevant ones or the misallocation of the evaluation's "sector codes" based on DAC codes<sup>25</sup> (see Table 4.6 under section 4.2.1).

The following phases addressed those shortcomings.

**Phase 2: Addition of missing information by cross-checking OECD extraction with CRIS database**

**Step 3:** The evaluation extracted from CRIS the PSD-related contracts previously identified in the OECD database, based on their CRIS reference in column "project number" of the the OECD Aid Activity database of the DAC (the Creditor Reporting System).

***Caveat:** for 7% of the total of OECD database projects identified as PSD-related (with common CRIS marker), the contract could not be found within CRIS, as they could not be retrieved in CRIS.*

**Step 4:** the evaluation team **report DAC codes, as encoded in the OECD database**, for all contracts within the CRIS extraction and corrected DAC codes which had been wrongly encoded.

**Phase 3: Cross-checking of CRIS extraction with DEVCO C4's lists**

**Step 5:** the extraction from CRIS was **cross-checked** with DEVCO C4's list of PSD-related projects ongoing in 2010 and its list of Commission's Sector budget support interventions.

***Caveat:** 7% of DEVCO C4 Decisions do not have a CRIS reference. Additionally 11% of DEVCO C4 Decisions could not be added to the inventory as they could not be retrieved in CRIS.*

**Decisions** in the DEVCO C4 lists which had not been identified in the first CRIS extraction were added. Additionally, all **contracts** contracted under those additional Decisions were extracted and missing ones **were added to the dataset**.

---

<sup>25</sup> For example, contract N° 95723 "Developing Health Accounts for Selected Indian states" is DAC encoded 25010 in the OECD database "Business support services and institutions", but should not be considered as PSD activity. Similarly, contract #129389 "Préparation d'entreprises publiques à la privatisation" should be encoded 25020 "Privatization", instead of 24030 "Formal sector financial intermediaries".

**Step 6:** the final extraction (CRIS based on OECD database completed by DEVCO C4's list and additional contracts) was **checked line-by-line** in order to remove “only” trade-related interventions or other non-relevant interventions.<sup>26</sup> The line-by-line exercise mitigates the risk of having non-relevant interventions or a misallocation of DAC codes in the database. Each choice was validated by cross-checking them with the other available sources of information. *In total, 2,355 contracts with sector codes have been identified.*

#### **Phase 4: Categorisation of interventions**

##### **Step 7:**

In order to begin the analysis of the inventory, **additional pieces of information were extracted** from the inventory and processed at the level of each intervention.

- Based on DAC codes, decisions' and contracts' titles and the evaluation team's typology (see Table 4.6 above), **the evaluation team allocated PSD sector codes to each single intervention** included in the inventory. The Sector Budget Supports have been classified under a “Multi” category, as, per definition, they support a sector-wide reform process and cover multiple areas of intervention. Intervention titles were not always clear. Choices had to be made by the team based on the information available. However each choice was, to the extent possible, validated by cross-checking them with the other available sources of information.
- Secondly, **channels of delivery** used by the Commission to implement its aid were determined on the basis of the name of the “contracting party” reported in CRIS. Channels of delivery were then categorised under main channels such as international organisations, CSOs, private companies etc.

#### **1.2.2 The methodology to identify the Commission's *indirect* support to PSD: list of GBS contracts with reference to PSD**

The OECD Aid Activity database of the DAC (the Creditor Reporting System) did not include general budget supports (GBSs) related to PSD, they therefore had to be identified in a separate list.

**As agreed with the evaluation's reference group, the data sources used were:**

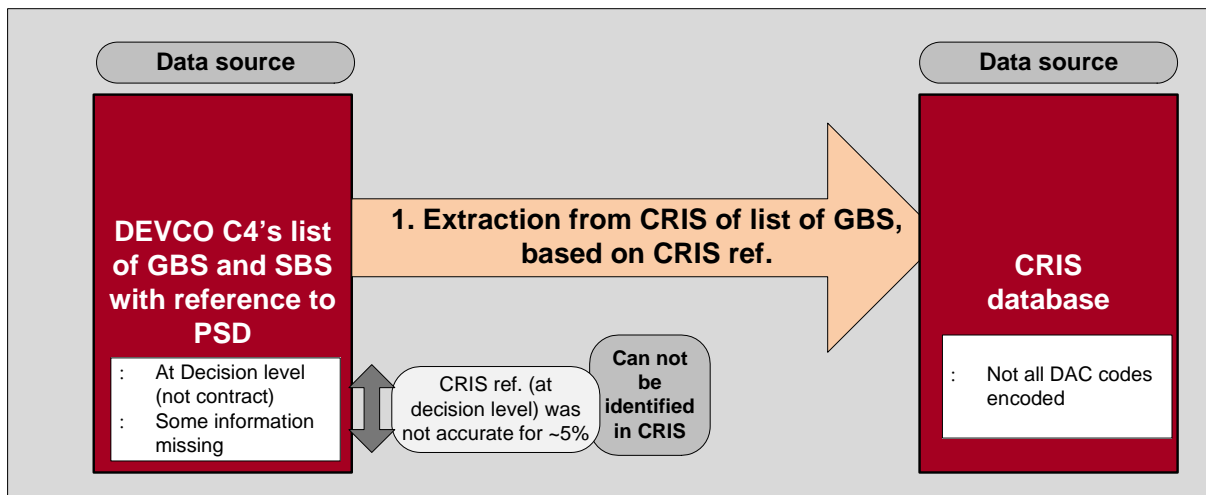

- A list of the Commission's budget support interventions (GBSs with reference to PSD and SBSs) by DEVCO C4 to the evaluation team. DEVCO C4's list of GBS/SBS is at Decision level however and does not include interventions at contract level. Some of the required information (e.g. contracted amounts, paid amounts, contracting parties for example) was also missing; *and*
- The CRIS database.

<sup>26</sup> This concerned interventions that were clearly focusing on trade, e.g. because they supported the development of a trade development strategy, were only export related etc.

**Caveat:** For ~5% of SBS/GBS lines (i.e. 5 references) in DEVCO C4's list, the CRIS reference (at decision level) was not accurate and could not be identified in CRIS.

To collect the required information on the Commission's *indirect* support to PSD, i.e. on the GBSs related to PSD, the evaluation team followed the approach presented in the figure below.

**Figure 1.10 – Approach used to identify the Commission's *indirect* support to PSD**

GBSs with references to PSD reported in DEVCO C4's included a CRIS decision code. This code was used to extract from CRIS the additional information required at Decision level. The CRIS reference code was also used for extractions at Contract level. ***In total 80 GBS contracts were identified.***

### 1.2.3 Elements to take into account

The evaluation team considers the methodological approach outlined above as the most appropriate for producing an inventory of the Commission's support to PSD.

There are, however, certain limitations to our approach which need to be borne in mind when considering the results of the inventory. These are detailed below:

- The OECD Aid Activity database of the DAC (the Creditor Reporting System) and CRIS' inherent limitations cannot be overcome by the evaluation team. Those include the data encoding which is manual and may therefore lead to encoding mistakes (and thus problems in identifying interventions), gaps in the information or sector codes encoded etc.
- The evaluation team's selection of interventions for the inventory is based on (1) our interpretation of the available information and (2) on the team's combined evaluation and thematic experience to include or exclude interventions as "in" or "out" of the evaluation scope and to allocate them to the correct PSD sector codes, as defined by the intervention logic. As mentioned above, each choice was to the extent possible validated by cross-checking them with other available sources of information.
