

Extending Broadband Connectivity in Southeast Asia

Policy recommendations

1

Strengthen the independence of regulatory bodies

2

Conduct regular competition assessments

3

Facilitate private sector participation

4

Streamline administrative processes

5

Promote coordination of civil works

6

Leverage synergies between coverage and adoption policies

7

Publish granular and reliable data for network quality

8

Promote policies to enhance network resilience

9

Promote smart and sustainable networks

10

Regularly assess the state of connectivity
