CC15

- **Opening Remarks by the OECD Secretary General, Mr. Angel Gurría**
- **Keynote Address by Her Royal Highness Crown Princess Mary of Denmark, delivered by Ambassador Carsten Staur, Permanent Representative of Denmark to the OECD**

Twenty-five years from the adoption of the Beijing Declaration and Platform for Action, and ten years before the date set for achieving the Sustainable Development Goals, gender inequalities persist throughout the world. They are often at the root of women's different exposure to natural hazards and environmental degradation, or result in lost economic and education opportunities and reduced well-being. A gender perspective is often missing in environment-related sectors and policies, despite women's and men's different relationship with the environment and environmental risks in most of countries and cultures. This OECD 2020 Global Forum on Environment will discuss needed transformations to achieve both environmental and gender equality goals.

The OECD Global Forum on Environment will highlight how governments, experts, business and civil society can advance mainstreaming gender into environmental policies and environment-related sectors, identifying data and evidence gaps, promoting gender inclusive urbanisation, enhancing economic opportunities for women in biodiversity restoration and agriculture as well as in circular economy and ensuring *just transition* to low carbon economy.

## Jeudi 5 mars

Maîtresses de cérémonie : **Mme Sigita Strumskyte**, Coordinatrice égalité hommes-femmes et ODD, Direction de l'environnement, OCDE & **Mme Eija Kiiskinen**, Coordinatrice, Relations globales, Direction de l'environnement, OCDE

9h30 – 10h00

- **Allocution inaugurale de Son Altesse Royale la princesse Mary, Princesse héritière de Danemark délivrée par Ambassadeur Carsten Staur, Représentant Permanent de Danemark auprès l'OCDE**

Vingt-cinq ans après l'adoption de la Déclaration et du programme d'action de Beijing et à dix ans de la date prévue de réalisation des Objectifs de développement durable, les inégalités entre hommes et femmes persistent partout dans le monde. Bien souvent, elles sont la cause profonde des différences d'exposition aux aléas naturels et aux effets de la dégradation de l'environnement dont pâtissent les femmes, obligent celles-ci à renoncer à des opportunités économiques et à des possibilités d'éducation, et nuisent à leur bien-être. La problématique hommes-femmes est souvent ignorée dans les secteurs et les politiques en lien avec l'environnement, bien que les rapports avec l'environnement et les risques environnementaux soient différents pour les femmes et les hommes dans la plupart des pays et cultures. L'édition 2020 du Forum mondial sur l'environnement de l'OCDE sera l'occasion d'une réflexion sur les transformations qui s'imposent pour atteindre à la fois les objectifs d'environnement et de parité.

## Agenda / Ordre du jour

### MAINSTREAMING GENDER AND EMPOWERING WOMEN FOR ENVIRONMENTAL SUSTAINABILITY

L'OCDE travaille depuis des décennies avec détermination sur les questions d'égalité hommes-femmes et d'autonomisation des femmes. Des nouveaux efforts sont cependant nécessaires pour accélérer la prise en compte de la problématique hommes-femmes dans tous les processus de décision et domaines d'intervention des pouvoirs publics, y compris l'environnement, et atteindre ainsi les cibles du Programme à l'horizon 2030. Le Forum mondial sur l'environnement de l'OCDE fera ressortir comment les gouvernements, les experts, les entreprises et la société civile peuvent favoriser la prise en compte systématique de la problématique hommes-femmes dans les politiques environnementales et les secteurs en rapport avec l'environnement, l'identification des lacunes à combler dans les données et les informations factuelles, une urbanisation soucieuse de l'égalité hommes-femmes, de meilleures opportunités économiques pour les femmes dans la restauration de la biodiversité, l'agriculture et l'économie circulaire, de même qu'une *transition juste* vers une économie bas en carbone.
