

Head,
Center for Innovation Systems & Policy, Austrian Institute of Technology

Dr. Matthias Weber is Head of the Center for Innovation Systems & Policy at AIT Austrian Institute of Technology and Invited Professor at Université Gustave Eiffel, Laboratoire Interdisciplinaire Science, Innovation, Société. He has a background in process engineering, political sciences and economics, and has been working for more than twenty-five years on the transformation of socio-technical systems, innovation system analysis, foresight, and the governance and evaluation of science, technology and innovation policy. In recent years, he has been member of various expert and advisory groups to the European Commission, the European Council, the OECD and national governments on matters of foresight and transformative/mission-oriented innovation policy. Currently, he is director of the “Foresight on Demand” framework contract in support of the European Commission’s Horizon Europe framework programme, and co-leader of the EC-funded TRAMI project on transnational cooperation on the missions approach.
