Cases started before 1 January 2016	Average time
Transfer pricing cases	75.55

Definition of a MAP case and counting of MAP cases

Finland has followed the MAP Statistics Reporting Framework.

Category of cases

Finland has classified attribution / allocation cases as cases where the same income has been taxed in two jurisdictions based on national transfer pricing adjustment rules and PE income attribution (Art. 7) cases. Other cases include corporate income tax cases not related to attribution / allocation, cases where the functions of a foreign company have been considered to establish a PE for the company (Art. 5), withholding tax cases and cases concerning individuals. This same classification has been applied for pre-2016 cases and post-2015 cases.

The average time taken to close MAP cases that started before 1 January 2016 was computed by applying the following rules: (i) start date: the date when a taxpayer submitted a MAP request, or for cases when the MAP request was submitted in the other jurisdiction concerned, the date of the first letter from the competent authority of Notes on the computation of ave that jurisdiction. For cases where the taxpayer was requested to submit additional information, the date on which this information was received by the competent authority; and (ii) end date: the date of the letter to the taxpayer notifying him of the outcome. Average time for pre-2016 cases indicates the time from start to end without deducting the time the case has been on hold because of the use of domestic legal remedies.
